

Plan to Vaccinate Your Children for Covid-19?

YOU MIGHT WANT TO WAIT

Here's why:

Doctors and scientists worldwide are now calling for a halt to this vaccine. Children have a 99.99% survival rate and long-term immunity.

Did you know?

Dr. Sucharit Bhakdi's concerns about pathogenic priming and more

- Vaccine manufacturers have zero liability for their shots – even if they have engaged in questionable science or used misleading statistics
- VAERS (the Vaccine Adverse Event Reporting System) has logged over 4,200 deaths linked to the shots (as of 5/14 - you can download the data yourself), and over 227,000 adverse events including tinnitus, migraines, blood clots and strokes. And these reports are vastly underreported.
- Mainstream media and "fact checkers" label those who ask questions about these vaccines as "anti-vaxxers," or "conspiracy theorists." Yet, those cautioning against these vaccines span the political and ideological spectrum and represent both conventional and alternative medicine. Why not hear what they have to say?

BMJ recommends against emergency use for children 12-15

Top 10 Things You Should Know About Covid-19 Vaccines

17-year-old with brain blood clots after first shot

Scan each of the above Quick Response (QR) codes with your phone camera, so you can read / watch them later.

Do you have enough information to make a decision for your child that is irreversible?

Here are more independent doctors and scientists who are asking questions: Dr. Paul Marik, Dr. Peter Doshi, Dr. Lee Merritt, Dr. Henry Ealy, Dr. Samantha Bailey, Dr. Ryan Cole, Dr. Thomas Levy, Dr. Jay Bhattacharya, Dr. Peter Breggin, Dr. Larry Palevsky, Dr. Daniel Chong, Dr. Pierre Kory, Dr. Leland Stillman, Dr. Harvey Risch, Dr. Michael Yeadon, Dr. Vandana Shiva, Dr. John Ioannidis, Dr. Zach Bush, Dr. Sherri Tenpenny, Dr. David Martin, Dr. David Brownstein, Dr. Peter McCullough, Dr. Christiane Northrup, Dr. Michael Levitt, and many more . . .
