Coronavirus Cases History Data Plots as of 10.1.20 by PADRAK 10.5.21

The data has been copied from Daily Stats links on the internet as listed. New Cases going to zero and then rising are due to lack of data for those days. Note the number of New Cases Per Day on the right. That MUST drop to 0! When we get NO NEW CASES – then the pandemic will finally be over!

Any data for missing dates or for the same data has been interpolated.

From the John Hopkins University data reference cited.
Florida Cases

Florida New Cases

Israel Cases

Israel New Cases

Spain Cases

Spain New Cases

Italy Cases

Italy New Cases

Japan Cases

Japan New Cases
