00:00
and with that we'll bring in a man who
00:01
has a multiple degrees from MIT
00:03
including a PhD in biological
00:05
engineering he is also running for
00:07
Senate in 2020 welcome dr. Shiva so nice
00:10
to have you on the show today great to
00:12
be here Christine I hope you're well
00:15
absolutely okay so we've all been held
00:17
as a captive audience right watching
00:20
President Donald Trump handle the corona
00:21
virus outbreak the situation he has
00:24
received both praise and criticism what
00:27
do you think how has the president
00:28
handled the outbreak
00:30
well he's handled you know is the best
00:34
he could given the fact that he's
00:35
surrounded by sharks and people who are
00:38
not really advising him well on the
00:39
science side of it what I'm talking
about is foul Chi and that's what's unfortunate because you know the president went through the Russian collusion nonsense that he had to go through then he had to go through the impeachment thing and now he's having the deal with this coronavirus and unfortunately this guy fowey has been in this environment for nearly four decades across multiple presidents and he's essentially embedded into the scientific establishment which has created an unfortunate lie about the immune system and an unfortunate lie about the solution to something like this called a corona virus or more importantly infectious disease without any real emphasis which is a real issue about the fact that it is a overactive dysfunctional weakened immune system that over reacts and that's what causes damage to the body and unfortunately
01:29 foul Chi has not talked about that
01:30 because the truth of that leads to a
01:33 solution which has nothing to do with
01:35 mandating vaccines and shutting down the
01:37 country and that's what's unfortunate
01:41 absolutely and I'm glad you said
01:43 solution I'm gonna get back to that a
01:44 little later in the discussion but many
01:46 people you are talking about dr. felcher
01:48 right now many people are questioning
01:50 both doctor foul Chi and dr. Burks when
01:52 it comes to these models that continue
01:54 to change and their motives which you
01:56 kind of touched on a little bit what is
01:58 your take on these doctors that are
02:00 advising the President and why they're
02:02 advising him the way that they are look
02:05 if you look Kristina at the typical MD
02:09 many of them go into wanting to become a
02:11 doctor out of some noble service but
02:13 fundamentally the medical school
02:14 education is really a Big Pharma a
medical education where the doctors really train if this than this and that then is typically a pharmaceutical drug or some harsh medical intervention now if you look at someone like a foul Qi and bricks they're sort of at the top of their quote-unquote game which means they're highly embedded into the Big Pharma model of medical education and the Big Pharma model of what the solution is and that solution is typically a direct line from this disease find typically a virus or a bug and then recommend a vaccine or some harsh chemical solution and most of that has to do with profiting the very very big pharma companies and so if you look at someone like Voucher he's a guy who architected the big lie that HIV is responsible for AIDS and it's a much deeper discussion but he built his entire career on that not talking about
the fact it's the suppression of the immune system and people's immune system gets suppressed you can react to all sorts of exogenous things coming in so this gentleman and by the way he he prides himself on connections with Hollywood and Elton John and all this and I think there's a group trying to make him the sexiest man alive on people but you're talking about a guys embedded into the deep state and he's your typical example of the worst of the modern scientific establishment okay well let's take a look at this right now h1n1 the swine flu right back then there was a completely different reaction to it doctor foul she was in the administration at that time President Barack Obama he had a completely different reaction thought she had different recommendations that he's having now even the media coverage has
been completely different from the swine flu now to the corona virus why do you see such a change well look if you take a systems approach a systems approach forces you to integrate multiple pieces there's a political piece here there's a health piece here and there's the economic piece here in the case of Barack Obama there wasn't a quote/unquote overreaction right we didn't shut down the country we we had people the media essentially protected here's a gentleman Obama I'm talking about who did not the big banks to fail when they should have failed he used quantitative easing to essentially bail them out and since 2008 9 this country has been essentially on a crack model of running the economy where we print money and that's what the country has gotten used to and because of Obama we decidedly destroyed our
economic base by outsourcing a tremendous amount of manufacturing to China we destroyed our innovation base by allowing China to steal so when Trump comes into office he's dealing essentially with a catastrophic situation and I think Trump knew that what was going on with the Fed and with quantitative easing was going to destroy the economy of this country so at best what he was trying to do is save the economy by bringing back manufacturing by protecting the you know intellectual property drainage in this country however when you have the level of things that he had to go through I think the deep states really affect was to hit him with this coronavirus and what's the end goal well as you just rightfully said when Obama was running you had nearly I think 60,000 debts right with h1n1 here you have close to maybe six
ten thousand deaths and we don't even know what the numerator and the denominator are here because they're blanketly assigning CoV ID 19 to people who may not even have it and we're seeing a condiment and you know a number of there's drop-in pneumonia so where's those drops you know the people are getting the flu and the flu season so you have totally cooking of the books and I can go more into detail on that we you have the cooking of the books you have a political motive of the fact that the establishment elite did not want a guy like Donald Trump ever getting elected you know and so he did get elected so they've been reeling from that and I don't think they want him to get a second term nor do they want a guy like me to you know win in Massachusetts but given that what you're looking at is
a is a strategic move to essentially destroy the economy as using it as a vehicle to impose not only vaccine mandate which we can talk about but also as an opportunity to suppress dissent and destroy freedom as a way to curtail what a guy like Donald Trump what people an American can do and this is essentially been the modus operandi of people like Falchi for many many years but for him this is a huge opportunity and this this ain't his first rodeo this is his second roadie if you go back and looking at the hiv/aids you know fake causality you know what you just brought up something about the death count and I wanted to touch on that with you we are hearing reports from doctors who are saying they are being instructed to count deaths as coronavirus deaths even if the person died from a different
condition but at some point in time had contact with somebody who had coronavirus dr. Burks just came out and said they're classifying everybody with the virus as a death instead of dying from the die virus as a death why do you think that they are classifying this way why do you think there is an exaggeration in the numbers here if you think there's an exaggeration in the death count numbers look what I do know is this that the w-h-o in conjunction with the CDC is the one that decides what are called codes diagnosis codes most people don't know when you go into a doctor's office a doctor looks at you and in their you know IT systems they have to say okay Christina has this or this that is called a diagnosis code that code Christina comes from the w-h-o so for coronaviruses I understand they created two codes one code was you
explicitly you know had a test and you
might see OB ID 19 the other one was
completely nebulous well sort of smells
like that maybe he's got some chest
pains something so broad but it was
still under the CoV ID the doctors in
the United States received a letter from
the CDC as I have found out that went to
hospital administrators encouraging them
to blur both of those codes so if
someone comes in they have a
pre-existing condition someone with a
chest pain CoV ID 19 okay and in fact
when someone dies they do the tests
sometimes a test doesn't come back for
14 days they're still putting COPD i-19
on them so they're increasing the
numerator and then as far as the
denominator goes we don't even know how
many people actually have been infected
because this is again
Flugtag virus so the denominator could
be massive so you have cooking of the
books for two reasons hospital
administrators get money for the co B ID
19 diagnosis plus they also get
kickbacks that were to call GPOs and
PBM for the ventilators so there's a
total collusion going on and it's not
about at all about people's lives
so those critically ill patients
immediately they put them on ventilators
and as I've shared in one of my videos
the ventilators actually can burst and
further damage the lungs because a real
issue here is lungs of being filled
with fluid and the fluid is occurring
but because of the over-reactive immune
system which can really be addressed by
IV vitamin C high dosage and that is not
in the discourse in fact 80 to 90
percent of the people go on ventilators
are dying so this is essentially a death
sentence that they're putting people on
Wow that is so interesting well
President Donald Trump said that the cure cannot be worse than the problem and yet here we are we continue to be on lockdown status do you think the economy should have been closed in the first place and is this the new status quo any time we see a new virus it's a great question in my letter to the president you know which I sent on March 23rd I said look we live in the era of personalized and precision medicine which is an expertise of mine which I get invited all over the world to talk about what is it what that means is one size does not fit all you don't lock down everyone that's what foul cheese model is it's a medieval model of Medicine and so what we fundamentally have is the approach that we should be taking is taking the people or truly immunocompromised truly FCO vdi
teen fine they should be isolated boost
it up with immuno immuno supporting
things like vitamin A D and C those of
us who are well you know we should be
back to work we should be running this
economy okay if you want to take
something to support your immune system
do that which should be the vitamin A
the D etc one of the two most disastrous
things here are were socially distancing
people and hiding them go look at their
research a landmark study when you
isolate people that is one of worse than
the detriments from obesity smoking and
heart disease social isolation actually
leads to up regulation
inflammatory compounds in the body and
downright regulation of antiviral
compounds so you're basically increasing
the person for viral infection by the
amount of stress you're causing them
from social isolation and separate from
that we're telling people not to go out in the Sun which is vitamin D vitamin D is an antimicrobial so this is essentially a recipe for actually hurting people not really supporting them but all brought you under the rubric and you know media says it over and over again social distancing social distancing flatten the curve and this is sort of the nonsensical science that foul Chi's expounding and it's what needs to be exposed and really what we really need to talk about if we truly care about public health is building up people's immune system but that's not what Falchi and company are concerned about their model is big AG which dirty air dirty water dirty food they want people to consume not food that's healthy for them and then the solution is vaccine mandates think about what's gonna happen a year from now when you go
to get your driver's license Christina
where's your vaccine cart and foul she's
already talking about that being a
police state I hate to use these very
hearts terms but that is what we're
talking about control of the individual
it's it's a it's a very very dangerous
time but it's also an opportunity for
Americans to go back to our roots which
is freedom which is basically listening
to truth and basically starting to you
know take back what is really ours which
is our truth freedom and health and foul
she's not about that he serves and
masters of Bill Gates the Chan
Zuckerberg the Clintons the CDC the
whu-oh and in fact the Chinese this is
what we're seeing before in front of our
eyes is exporting Chinese model of
governance top-down controlling the last
oasis of freedom which is our human body
and it's very concerning it's very scary
as well as social distancing and we just
have a little bit of time left here
another thing they're pushing are these
masks and these gloves and I'm seeing
people making these makeshift homemade
masks and literally putting their lives
in the hands of these masks and gloves
how well do these actually work and you
touched on it just briefly but what is
the real solution to coronavirus
look the real solution Christina as any
solution to any pathogen we need to
understand that the medical
establishment the pharmaceutical medical
establishment for hundreds of years
has built this entire foundation of
always blaming a virus or a germ always
so when scurvy became her I remember
scurvy when people's teeth would fall
out and they had bleeding gums oh it
must be a virus well it was deficiency
in vitamin C a hundred years later when
even people on the ground knew it
when pellagra came out which was in
people's skin and everything would get
all dry horribly drying like eczema
ultimate conditions oh it must be the
Italians who are coming over the ship
they're bringing some dirty germs and we
need to quarantine them well it turned
out it was a deficiency niacin so on so
what we're seeing here is the virus
hunters of bacterial hunters creating
fear so the real solution says number
one is to recognize that the immune
system is quite strong we're actually a
walking ecosystem of germs 380 trillion
viruses 60 trillion bacteria among the
six trillion cells
there's viruses all around us the
realities a strong immune system always
handles us beautifully it's the weakened
immune system so all those masks and all
this stuff people then wear this for
humanity okay the issue is how do you beef up the immune system as I wrote to the president vitamin D vitamin D is an antimicrobial why do you think in many of these hot countries we don't hear any about this vitamin A which is all from the rich leafy green dark green vegetables and fruits that supports your body to create keratin cytokeratins through vitamin A which protects your cells so these are the two foundation pillars yet Falchi and bricks do not talk anything about that because the V and vitamin is an anathema for their vaccines and same with the V and vitamin C is an anathema for their ventilators you say it's ventilators and vaccines and this is big pharma and these guys need to be fully exposed and in my view as people like fout you need to be indicted for a lot of serious scientific crimes that's why when we put out this
petition fire Falchi i think close to
50,000 people have signed it in 48 hours
and at least we have it close to a
thousand medical dock
from all over the world everyday people
get this in fact the unfortunate
handcuff medical professionals get this
this is an opportunity a huge
opportunity Christina the real solution
is for us to rethink how much governance
and how much over respect we give to MDS
who unfortunately know nothing about the
immune system they don't study that in
medical college or medical school X
excellent points there dr. Sheba thank
you so much for joining us here at
Americans daily report and sharing your
insight we appreciate you
