

Email about William Campbell and Ivermectin 9.11.21

My name is William Campbell, in 2015 I won the Nobel prize in medicine for the discovery of Ivermectin. It cures many diseases including COVID-19. The fake news and big pharma want you to live in fear. Fauci won't promote Ivermectin because he is the little parasite it destroys.

**U.S. FOOD & DRUG  
ADMINISTRATION**

Dear Ms. Fortmann:

Thank you for contacting the Division of Industry and Consumer Education (DICE) at FDA's Center for Devices and Radiological Health (CDRH) [DICE@fda.hhs.gov](mailto:DICE@fda.hhs.gov) e-mail account.

Currently, there are many tests relating to and for the COVID-19 Coronavirus, however there is not a SPECIFIC TEST for the Delta or any other variant. If you wish to be tested for a current infection by any COVID-19 variant, you will need to get a prescription molecular test which has been available for awhile.

FDA's information on testing can be found at:

<https://www.fda.gov/consumers/consumer-updates/coronavirus-disease-2019-testing-basics>

<https://www.fda.gov/media/140161/download>

CDC's information on the Delta variant at:

<https://www.cdc.gov/coronavirus/2019-ncov/variants/delta-variant.html>

If you have any further questions, feel free to write me back. I hope this information is helpful.

Sincerely,

Consumer Team  
Division of Industry and Consumer Education  
Office of Communication and Education  
Center for Devices and Radiological Health  
U.S. Food and Drug Administration
