all right hello everyone today is the 23rd of July 2021 and I thought I'd better put this up I have a really good source that has contact with both active and retired military of course I'm I'm no longer with the military but uh I'm I'm very aware of uh how the military operates obviously and as I've been telling you for a long time uh things are getting really nasty uh we see what's happened with the supply chains with and I mentioned this yesterday the ships offshore the the containers sitting and not being able to get transported or getting materials transferred to them the rail lines being basically slowed down even stopped in other words ladies and gentlemen they're turning off the economy and I think anybody knows that I went to get gas this morning and in Salt Lake City at a Costco it's now four dollars a gallon for premium which is what I use in my car because I'm trying to I'm trying to extend its life but at any rate uh the point is is that the shells are getting their uh energy is getting more scarce uh we have all of these different things happening with what apparently our attacks on the grid hello Marshall how you doing attacks on the grid uh cyber attacks uh warnings from from the elites that they're going to be all of these different cyber pandemics et cetera so in other words as I've said they're attacking us on multiple multiple fronts in depth and with full spectrum dominance so I've been watching as people have been warning about the problem with uh the shutdowns and the and the supply especially food and basic necessities well uh I received a bit of information yesterday and further this this morning that uh on military on certain military bases I imagine this is throughout the entire military and I don't know about the enlisted ranks okay but apparently amongst the officers especially the higher up officers uh O 405 etc they're being told to get their houses in order with what's coming now what they're saying is is that they need to go out and get food water and supplies now now you'd think that being on military installations they would have access because the military has to continue taking care of their hymen's cat have to take care of their people but that may not necessarily mean the families especially in a in a bad situation but whatever's going on uh whatever it is with the movement of materials the move military materials I've talked about uh seeing uh some US military tactical vehicles being stockpiled in places where they normally aren't and a lot of people were saying oh this is because uh you know this is when they're doing their their summer uh training uh I know what happens in summer training and these these are not for summer training like that's not what's happening they're repositioning vehicles uh they're get something's getting ready to go down I guess and with this situation with them telling to get there telling the military officers to get their uh their houses in order and to get supplies food water etc for themselves and their families is critical so that's inside information uh no I'm not going to give you the source I think if you're smart enough and I think most of you are despite the trolls out there that if you if you're watching any of this going on you can see it anyway you don't need me to tell you this but the additional information that inside military folks are are saying get ready you got to get get yourself supplied because this is going to go south real quick I don't know why it could be a situation with China it could be that you know Biden's invited the U.N in we're seeing what apparently are some U.N identifications here and there I don't know that for sure I I don't have direct information on that but this is direct information that that inside the military amongst the upper officer ranks at any rate whether it's official or not I doubt I doubt it's official I don't think this is coming down from Sec Death or

or from uh the chairman of the joint chiefs or anybody like that this is just people in the know in the military that are warning their buddies their officer friends you better get ready because this thing's going south right now get everything you need now don't wait so there are military families right now at least in the upper officer ranks that are hitting the costco's the walmarts the sans clubs etc trying to get their stuff together uh we see the shortages in the uk right now they're talking about it right now the entire lockdown that's going on there the unjustified things that are happening over all of this as i said and this this video i shouldn't even be putting it up this way because it'll probably be flagged right but this is the quickest way to reach everybody record this thing down now this is the warning i've been talking about it for a long time get yourselves ready as best you can okay all right i'm gonna go they're not on our side nobody in the government's on our side nobody in the corporations we've been marked for elimination it's pretty obvious see y'all later
