Very unfortunately the forecast that 1.5 million Americans may die from coronavirus seems authoritative.

Apparently the best ways to stop the coronavirus from infecting our throats are to take

5000 IUs of vitamin D per day

3000 milligrams of vitamin C per day, and to

gargle with warm salt water maybe twice a day (?)..

Please warn all local stores, etc to take these simple steps to stop the coronavirus from making them sick. I am especially worried about our Boulder City Albertson's supermarket shutting down.
