President Trump Announces Taking Hydroxychloroquine and Azithromycin and Zinc for Over a Week (Recipes) 5.19.20

Trump says he's taking hydroxychloroquine, despite scientists' concerns (May 19)

Trump — who has tested negative for Covid-19, the disease caused by the novel coronavirus — told reporters that he'd been taking hydroxychloroquine daily for the past week and a half, along with a daily dose of zinc and an initial dose of the antibiotic azithromycin, a combination that has been linked to increased incidences of cardiac arrest.

A NY Doctor on FoxTV Hydroxy Chloroquine/Azithromycin results (May 13)
https://twitter.com/AwfySore/status/1260469653299761154

200mg 2x daily Hydroxy Chloroquine
500mg 1x daily Azithromycin
(The Z-Pak is a 5-day course of azithromycin (Zithromax), an antibiotic. It's used to treat certain bacterial infections, including some sinus infections and upper respiratory tract infections that lead to headaches, sore throat, congestion, and runny noses.)
220mg 1x daily Zinc sulfate
350 patients
• Breathing restored 3-4 hours
• Zero deaths
• Zero hospitalizations
• Zero intubations

More on Hydroxychloroquine/Azithromycin. And On Dr. Raoult (March 29)

Dr. Didier Raoult of Marseilles and his co-workers have published another preprint on clinical results with the chloroquine/azithromycin combination that their earlier work has made famous.
