# BUSTED. LOOK AT WHAT THE BASTARDS DID.

Multisystem inflammatory syndrome in children was listed as a COVID VAX SIDE EFFECT in this FDA presentation dated October 22 2020. They knew how bad the shot was and allowed it to be used anyway. This is a screen capture from a video in their presentation, where they quickly skipped over this slide and you had to pause it to read it.

NOW THAT THE SHOT IS INDEED CAUSING MULTISYSTEM INFLAMMATORY SYNDROME IN CHILDREN, THE CDC IS SAYING "OH, THAT'S JUST A SYMPTOM OF COVID!!!"
