Hello -k,

Dr [-] wanted me to advise you that we are following CDC recommendation where it concerns swabbing/testing for COVID19.

You must screen positive for the following screening:

"During the last 14 days have you traveled to any parts of China, Hong Kong, Iran, Italy, Japan and South Korea?

Do you currently have any cough, sore throat, shortness of breath, fever (at or over 37.8°C) ? [100.04 F]

Have you had contact with a known confirmed case?"

After a positive screening [meaning did you say “yes” to any of these questions], the physician evaluates if corona virus testing should be ordered in concurrence with the county health department.
