Several Sutter facilities now have respiratory clinics open. The purpose of these clinics is to evaluate and treat patients with respiratory symptoms separately from the general population.

This helps prevent the spread of illness to other patients in our waiting rooms.

General COVID-19 testing for the public is not available at this time.

We are here to help, and want to both keep you healthy and assist you in feeling better if ill. If you are feeling sick and your symptoms are not improving, please send a message to your care team or request a video visit through My Health Online. You can also visit sutterhealth.org for additional information. Our providers can provide the best treatment if they can counsel you before you come into a care center.
