How Do I Get COVID-19 Medication? -----

<https://americasfrontlinedoctors.org/treatments/how-do-i-get-covid-19-medication/>

Click on the Contact A Physician button. <https://speakwithanmd.com/americasfrontlinedoctors/>
Fill out the form and pay \$90. The physician will call you typically within 2-7 days (not counting weekends). Please keep your phone with you. After your telemed appointment, the pharmacy will contact you for your payment information and mailing address to send the prescription to you. If you have questions for the pharmacy, please contact Ravkoo Pharmacy at 863-875-5700 or email them at support@ravkoo.com.
Hydroxychloroquine (HCQ), Ivermectin, and other COVID-19 medications can be obtained by prescription in the USA in almost every state.

Hydroxychloroquine (Tablets) -----

<https://americasfrontlinedoctors.org/treatments/hydroxychloroquine>

Hydroxychloroquine 400 mg. twice a day on the first day + elemental zinc 50 mg. daily then
Hydroxychloroquine 400 mg. weekly + zinc 50 mg. daily

Hydroxychloroquine tablets in the USA are 200 mg. Two can be taken together at the same time or separated by hours-days, as long as a person takes 400 mg. weekly. Currently there are studies underway to see if 200 mg weekly is sufficient.

This protocol is used across the world. For example, see the country of India in the White Paper (reference 19). In this example, the National Task for the COVID-19 constituted by Indian Council of Medical Research recommendations for HCQ for prophylaxis of SARS-CoV-2 infection for selected individuals.

Ivermectin (Tablets) -----

<https://americasfrontlinedoctors.org/treatments/ivermectin>

We at AFLDS have known for many months that Ivermectin is a safe and effective treatment for COVID- 19. To preempt unlawful restrictions by the medical and pharmaceutical boards as we witnessed with our endorsement of HCQ, we did not discuss it publicly. While there are more studies showing that HCQ is superior to Ivermectin in the treatment of COVID-19, it remains up to your physician to help you make the best decision.

Early administration of inhaled budesonide reduced the likelihood of needing urgent medical care and reduced time to recovery after early COVID-19.

Clinical recovery was 1 day shorter in the budesonide group compared with the usual care group.

Budesonide was safe, with only five (7%) participants reporting self-limiting adverse events.

This is made from pure zinc just like Colloidal Silver is made from pure silver. Easy to do at home. See the materials list. Uses copper wire, one AA battery, a jar, and a cheap blowtorch.

When the flu is just starting, take 3-4 100 ml at a time for at least 10 days. This is a little over 1/3 cup. If you are really sick, take 100 ml every 1/2 hour as well as put a wet cloth with the plasma water on the chest and back and the head.

Tea -----

<https://teluguodu.com/corona-virus-cure-found/>

The tea plant creates these chemicals as a way to ward off insects and other animals. Who would have known that all the solution to these virus would be a simple cup of TEA. and that is the reason so many patients in China are being cured.
