MEMORANDUM FOR: Immediate Commander, Unit

SUBJECT: Request for Religious Accommodation – Rank Name, Unit

1. I request a religious accommodation to not be required to receive a vaccination for COVID-19 in accordance with the standards provided in Army Regulation 40-562 (Immunizations And Chemoprophylaxis For The Prevention of Infectious Diseases), 10 Jul 2013; and in accordance with the standards provided in Army Directive 2018-19 (Approval, Disapproval, and Elevation of Requests for Religious Accommodation), 8 Nov 2018.

2. This request is based on the doctrinal mandate to abstain from any medicines which are the product of immoral production, and the religious advisory of the synods, hierarchs, elders, medical workers of the Eastern Orthodox Church against the COVID-19 vaccine.

3. I understand that, if my request is disapproved, I understand I may continue to serve without an accommodation, or I may request administrative separation. I also understand that an approved accommodation continues throughout my army career, but may be suspended, modified, or revoked by appropriate authorities when required by military necessity.

4. The point of contact for this request is the undersigned at XXX-XXX-XXXX or EMAIL.

Encl.
Doctrinal Documents and Statements of the Orthodox Church pertaining to the COVID-19 VACCINE

Encl. That this Religious Accommodation Will not affect Mission Readiness

NAME Rank, AR UNIT
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

Below is a compilation of Synodal Statements, Medical Studies, Professional Dissertations, and Hierarchical and Monastic Statements which either forbid totally or recommend against receiving the COVID-19 Vaccine:

1. Bases of the Social Concept of the Russian Orthodox Church [1]

The Social Life Document of the Russian Orthodox Church, which is the largest Orthodox Jurisdiction on Earth, defines the absolute inadmissibility of medicines prepared using fetal therapy.

“The Church believes it to be definitely inadmissible to use the methods of so-called foetal therapy, in which the human foetus on various stages of its development is aborted and used in attempts to treat various diseases and to "rejuvenate" an organism. Denouncing abortion as a cardinal sin, the Church cannot find any justification for it either even if someone may possibly benefit from the destruction of a conceived human life. Contributing inevitably to ever wider spread and commercialization of abortion, this practice (even if its still hypothetical effectiveness could be proved scientifically) presents an example of glaring immorality and is criminal.”

This command is in point XII 7 of the Social Life Document. This document defines, as indicated by the name, appropriate Orthodox Christian living in as many aspects of society as is enumerated. Because of point XII 7, it would be a violation of my faith to receive the following coronavirus vaccines:

A. Pfizer and BioNTech – The Pfizer Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [3].
B. Moderna – The Moderna Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is cited by the vaccine researchers Kizzmekia S. Corbett, Darin K. Edwards, and Sarah R. Leist [4].
C. Johnson & Johnson – The J&J Vaccine has publicly admitted to using a cell line called PER.C6. This is published on the Janssen website [5]. This information is enumerated by the Lozier Institute [2].
D. Sputnik V – The Sputnik V Vaccine cites their manufacturers as using the abortion-derived cell line HEK-293 [6][7].
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

E. AstraZeneca – AstraZeneca was developed using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is also contained in documents permitting its emergency use in the United Kingdom [8].

F. Vaxart – Vaxart was produced with the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [9].

G. Altimmune – The Altimmune vaccine was produced and developed with the abortion-derived cell line PER.C6. This information is recorded by Altimmune’s own Clinical Trial Protocol [10]. This information is enumerated by the Lozier Institute [2].

H. COVAXX and United Biomedical – COVAXX was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [11].

I. Medicago – The Medicago Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [12].

J. Novavax – The Novavax Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by researchers at ScienceMag [13].

K. University of Pittsburgh “PittCoVacc” – PittCoVacc was produced with the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by EBioMedicine at the Lancet [14].

L. Walter Reed Army Institute – The Walter Reed Vaccine was produced with the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [15].

M. Sanofi Pasteur and Translate Bio – The Sanofi Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the vaccine researchers at NPJ Vaccines [16].

N. Inovio Pharmaceuticals – The Inovio Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by researchers at ScienceMag [17].

O. Arcturus Therapeutics – The Arcturus Vaccine was protein tested using the abortion-derived cell line HEK-293. This
information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [18].

P. Imperial College London – The Imperial College Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [19].

Q. Providence Therapeutics – The Providence Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [20].

R. CoronaVac – CoronoVac was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by researches at ScienceMag [21].

S. CanSino Biologics – The CanSino Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by researches at BioSpace [22].

T. ImmunityBio and NantKwest – The ImmunityBio Vaccine was developed, produced, and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [23].

U. Institut Pasteur and Themis and Merck – The Institut Pasteur Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Proceedings of the National Academy of Sciences of the United States of America [24].

V. Rega Institute, KU Leuven – The Rega Vaccine protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Global Virus Network [25].

W. Anhui Zhifei – The Anhui Zhifei Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cell Press Journal [26].

X. Clover Biopharmaceuticals – The Clover Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [2]. This information is recorded by the Cold Spring Harbor Laboratory [27].
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

The same Social Life Document also states “The transplantation of organs from a living donor can be based only on the voluntary self-sacrifice for the sake of another's life. In this case, the consent to explantation (removal of an organ) becomes a manifestation of love and compassion. However, a potential donor should be fully informed about possible consequences of the explanation of his organ for his health. The explanation that presents an immediate threat to the life of a donor is morally inadmissible.”

This is from the same point, XII 7, and therein it condemns the harvesting of biological material from a subject without their total informed consent. This condemns the usage of any vaccines manufactured utilizing stolen organs, thereby also condemning the CureVac Vaccine because it was protein tested on HeLa cells, which were harvested from an African American mother of five in 1951 without her knowledge or consent. This information is enumerated by the Lozier Institute [2]. This information is accounted by John Hopkin’s Magazine [28].

2. Greek Orthodox Press Release on “The Cloning of Embryonic Cells” [29]

The Greek Orthodox Church, which is the second in order among the non-patriarchal Autocephalous Jurisdictions, declared “Our Church expresses its categorical opposition to conducting experiments on human embryonic cells.” This is found in the 17.8.2000 Press Release on Embryo Cell Cloning. It further declares in the same Press Release that “the effort to improve life can not pass through the destruction of millions of human beings of embryonic age.”

This absolutely condemns the bulk of the already above-mentioned Vaccines which are the product of testing on cells harvested from aborted fetuses. This would make it a contradiction to my Orthodox faith to receive those vaccines even if said vaccines genuinely benefited me.

3. Romanian Orthodox Church Statement on “The Transplant of Organs” [30]

The Romanian Orthodox Church, which is fourth in the order of junior Patriarchates, lists mandatory principles for the moral use of human organs and tissues, and states: “Because the extraction of organs implies the consent of the donor, extraction of tissues from an embryo is inconceivable given the fact that although alive, this one cannot give its consent.”
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

On this basis, the Romanian Orthodox Church condemns all medical work profiting from the harvesting of cells from an embryo, or, in fact, any medical work profiting from the harvesting of cells from a non-consenting individual. This statement alone condemns all the above-mentioned vaccines on the basis that they come from either an aborted fetus or a non-consenting individual; in the vast majority of cases, these vaccines are condemned by both qualifications.

Also mentioned in this Statement in the Church’s view of death. The Church declares that “From a Christian point of view, death has two acceptances:

Man’s moving away from God through sin (death that can be temporary or eternal, according to the seriousness of the sin, repentance or its absence);

The physical death – materialized through the separation of the soul from the body. All Christian effort is to get rid of the eternal death through the dynamic communion with God in Christ, through the Holy Spirit. This fact does not exclude the care for the conditions, moment and way of separating the soul from the body.”

I am of the opinion that receiving the vaccines mentioned above would be participating in the sin of abortion, thereby resulting in my spiritual death. While neither death is desirable, the Church has since antiquity declared that spiritual death is magnitudes less desirable than physical death because spiritual death results in the eternal suffering of our souls, as is declared in Revelation 21:8 – “But the fearful, and unbelieving, and the abominable, and murderers, and whoremongers, and sorcerers, and idolaters, and all liars, shall have their part in the lake which burneth with fire and brimstone: which is the second death.” And again in Revelation 20:14 – “And death and hell were cast into the lake of fire. This is the second death.”

4. Inter-Church declaration by Archbishop Makarios [31]

Archbishop Makarios is a hierarch of the Ecumenical Patriarchate of Constantinople, the First Throned Patriarchate of the Orthodox Church. He worked with other religious officials of other churches to compose an InterChurch statement condemning the AstraZeneca Vaccine on the basis that it was developed using the abortion-derived cell line HEK-293. On this basis, most of the above-mentioned vaccines are condemned because of their usage of HEK-293 in the development or testing of their vaccines.
5. Moldovan Orthodox Church Declaration On The Threat Of COVID Vaccines [32]

The Moldovan Orthodox Church, which is a self-ruling jurisdiction of the Russian Orthodox Church, declared that the COVID Vaccines are a microchipping threat for faithful Christians.

In the statement, the Church states that “it must be said that vaccination carries the risk of microchipping or introducing foreign devices into the human body. The public in many European countries is protesting against mandatory vaccination, especially against the COVID-19 vaccine, because it considers it to be the way in which the world anti-Christ system wants to introduce microchips into people's bodies to control them...”

The Synod says affirmatively that the Vaccine is a microchipping threat and acknowledges that the public are concerned that there are greater forces governing the world which are using vaccines and microchips in order to control them in a scheme in service of the anti-Christ.

I do not know if the vaccine is a microchipping threat, nor do I know if greater forces are serving the anti-Christ using the vaccines, however I DO know that these are my spiritual shepherds and that they have been appointed as pastors of the Orthodox Christian flock due to their wisdom and diligence. They are wiser than I am, and I will trust this overwhelming opposition to the vaccine by the hierarchs of my Church. Therefore, I oppose the vaccine as a threat to me, and would like to request that they are not mandated so that I am not of any potential risk.

6. Georgian Orthodox Synod On The Necessity Of Vaccination Being A Free Choice And Not Compulsory [33]

The Georgian Orthodox Church, which is the second in the order of Junior Patriarchates, made a Synodal Statement concerning the vaccine. In the Synodal Statement, they declare “We welcome the fact that the Covid-Pandemic vaccination process has been declared voluntary and not mandatory; This is especially important today, when the vaccine is newly developed and health professionals in different countries have different opinions about it.”

The Georgian Church acknowledges that the different opinions are valid enough to be such a concern that the vaccines should not be compulsory and notes that this is “especially important.” I also believe that this is
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

especially important, and I believe this would be a contradiction of my Orthodox faith and thereby should not be mandatory.

7. Metropolitan Saba of Khoni Against The COVID Vaccine [34]

As a Bishop of the Orthodox Church, Metropolitan Saba is one of the highest authorities concerning Orthodox Christian living. He has voiced extreme opposition to the vaccine.

He states “today's virus, it is a means in the hands of the devil, to bring people under its influence,” and “there will come a time when a vaccine will be offered to humanity, to humans, which will serve not so much the virus, but the enslavement of humans, the management of humans, the subjugation of humans, and it will become one of the most important tools in the hands of the devil.”

He speaks of the danger of the vaccine, saying that it is a method of controlling the population, much less so than it will be for the management of any virus. As one who is charged with taking care of the Orthodox Christian flock, I take note of his warnings against the vaccine and acknowledge it alongside the warnings of many other Bishops, Elders, and Synods. I cannot, in good conscience, receive the vaccine as I see it as a threat to me, both spiritually and physically. My faith already forbids the COVID Vaccine.

8. Bishop Spiridon of Skhalta Against The COVID Vaccine [35]

Bishop Spiridon warns against the COVID Vaccine, saying that it is being created by evildoers. This is not difficult to believe, at least in an American context, given that Big Pharma is notorious for its corruption, and the primary supporters of the distribution of the vaccines are the unelected elites of society and the mainstream media.

“If a murderer, a maniac brings you medicine, will you drink it?” I do not trust. I will not bring home the medicine brought by them.”

“I am personally convinced that this is the devil’s trap! – These people will not give you any medicine,“

Bishop Spiridon warns that the elites are functioning as agents of the devil to present the vaccine as a trap. This implicates, not just vaccines produced with aborted fetal
cells, but ALL vaccines against coronavirus. This greatly concerns me, and I feel my readiness and functionality will be hindered if under any obligation to receive a vaccine against coronavirus.

9. Saint Paisios Warns Against the Vaccine [36]

In the Orthodox Church, exceptionally holy people are canonized as Saints. A canonization indicates the Church’s recognition that a person has already been received into the Kingdom of Heaven. These people have encountered God in a way not many people can comprehend, reaching heights of humility and divinization that the average man may never experience. Saint Paisios, in particular, lived such a holy life on earth that God bestowed upon him the gift of foresight, that is to say, he could spiritually warn with accuracy about the future. In one of his books, entitled “Spiritual Counsels II: Spiritual Awakening,” Saint Paisios displays his gift of foresight by predicting that a new vaccine (“new” relative to the time when he was alive) would be created to combat a new disease which will bear the Mark of the Beast on those who take it voluntarily.

“And now a vaccine has been developed to combat a new disease, which will be obligatory and those taking it will be marked.”

“Later on, anyone who is not marked with the number 666 will not be able to either buy or sell, to get a loan, to get a job, and so forth.”

Saint Paisios is eerily predicting many things which I have noticed, including the inexplicable push to mandate the vaccine in all areas of life. One such area is this line of work, which is the entire reason I have to request a religious exemption in the first place. This is the mindset behind the “Vaccine Passports” which some people are suggesting should be used as a prerequisite for flight by commercial plane, and some countries are using as prerequisite for any form of immigration. Saint Paisios saw a coming vaccine as the Mark of the Beast, bearing the number of his name: 666. I am aware of the Bible’s condemnation of those who bear his number, as all who take the Mark will be beyond salvation due to them having blasphemed the Holy Spirit by doing so. Whether or not the COVID Vaccine is the vaccine Saint Paisios warned about, I do not know, but I do know that there are many similarities between his foreseen vaccine and the COVID Vaccine. In order that I am not of any threat of taking the Mark of the
Beast, I am requesting an exemption to the mandate of the COVID Vaccine.

10. Elder Philotheos Against the Vaccine [37][38]

In the Orthodox Church, the highest accessible spiritual states are found in monasticism. Most canonized Saints are monks, and monks are considered the foremost spiritual fathers for Orthodox Christians. This is further demonstrated by the fact that the Spiritual Center of the Orthodox Church is Mount Athos, which as a monastic republic, composed exclusively of monks. The Holy Mountain is held in high regard as some of our greatest guides come from there. Therefore, it is if considerable note that the abbot of Karakallou Monastery on Mount Athos felt it necessary to make a video to inform Orthodox Christians around the world about the dangers of the COVID Vaccine.

Archimandrite Philotheos says “We sense that the coming of this pandemic was no accident, and in fact, that it was manufactured. And then came the vaccine, supposedly ‘to suppress the pandemic,’ but we sense that this is all being directed, is artificial, in order to achieve what they want—their ultimate purpose,”

“And we can see in the way they are now imposing the vaccine that the dark forces have their ultimate goal. We have also been prepared for this by the Revelation of St. John the Evangelist, and we have been warned by the Apostolic Fathers who speak of the days of the Antichrist,”

“They abolish democracy, abolish human rights, abolish so many things these days. How do they reconcile all this? Under the pretext, of course, of the pandemic that they have produced,”

Archimandrite Phилоtheos is in a position unlike Saint Paisios described before, in that he inhabits the world while this Vaccine is conquering the world. He sees it as an effort by higher authorities and elites to abolish human rights for the purpose of subjugating mankind to prepare for the antiChrist. He says this vaccine is prepare humanity to be sealed in the future, meaning the Mark of the Beast. This is unacceptable for an Orthodox Christian, as the Mark of the Beast cannot be repented of. I absolutely cannot be at threat of the Mark.

11. Elder Parthenius Against the Vaccine [39][40]
A. Another Abbot of the Holy Mountain, from a different monastery, speaks against the COVID Vaccine. This is all weighing heavily on the vaccine. Elder Parthenenius is the abbot of Saint Paul’s Monastery, and here he speaks against the vaccine saying that we ought the Lord’s Will far sooner than a man made solution. We ought to pray against the virus as “Our hope is that whoever trusts in God will not be ashamed. We must rely not on our own strength, but on the mercy and love of God.”

Elder Parthenenius refuses to bless anyone to receive the vaccine as it lines up too closely with what is written in Revelation 13. By its fruits we shall know it, and although the vaccine doesn’t perfectly align with Revelation 13, the similarities should strike us as notable.

12. Elder Efthymios Against the Vaccine [41]

Elder Efthymios is another Athonite monk who speaks about the suspicious nature of the vaccine. He firstly says “Those who do not want to be vaccinated, no one should and does not have the right to force them to be vaccinated in any way.” He goes on to say that the vaccine was made obligatory in some areas before it was ever even manufactured. “There is a cure,” he says, “but some do not want it.” The cure he speaks about is the Body and Blood of Christ. This is a greater vaccine than anything created by mankind. “The vaccine is not a cure,” he notes as being confirmed by Nobel Prize winning French Scientist Luc Antoine Montagnier. Elder Efthymios speculates that if the vaccine were genuinely and helpful, it would not need all this propaganda. Therefore there is reasonable suspicion of the vaccine, and it is within all appropriate logic to avoid it.

13. Metropolitan Seraphim of Kythira Against the Vaccine [42][43]

Metropolitan Seraphim is bishop of the Church of Cyprus, the first in the order of non-patriarchal Autocephalous Jurisdictions in the Orthodox Church. He has condemned the vaccines harshly for being the products of aborted fetal cells. Citing information from Italy, he notes that “the vaccine is made from aborted fetuses,” saying that it is impossible for the Orthodox to accept such a thing even if it is in the best economic interests of the people, because what matters more than the economy is proper enforcement of morality.
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

I cannot accept a vaccine which results from the murder of babies, and therefore am requesting an exemption to the vaccine so that I do not participate in this grave sin.

14. Father Alexander Demonstrates the Moral Peril of the COVID Vaccine [44]

Father Alexander is a highly respected academic, author, and speaker. He served as an Orthodox Chaplain in the United States Army for over 24 years, achieving the rank of Colonel. He also served as a Dean and Professor of Moral Theology Emeritus at Holy Trinity Seminary. In light of his impressive resume, he would unquestionably support an exemption for Orthodox Christian receiving the COVID Vaccine. He says “We must reject, on moral grounds, all COVID-19 vaccines that have any connection to aborted preborn baby cells.” This condemns practically every available COVID Vaccine, and surely you cannot suppose that one violate their own moral codes for the sake of a negligibly beneficial vaccine? “According to traditional Orthodox moral theology (as opposed to revisionist variations so common today), certain actions (‘means” to “ends”) are objectively, intrinsically evil under any “circumstances”—most notably, abortion, rape, incest, child abuse, physical torture, and deliberate targeting of non-combatants in war.” Fr Alexander knows the price that must be paid for anyone who participates in this grave evils, even if that evil is FDA Approved.

15. Saint Nikephoros the Leper Reveals the True Cure [45]

Saint Nikephoros was a monk granted the rank of the Angelic Schema, the highest order of monks in the Orthodox Church. For the majority of his life, he suffered from leprosy. In his time, he was unable to obtain medicine for the disease. He lived among lepers so as to not spread the disease among the healthy. As he progressed in his life and grew in his holiness, he came to a point where the disease would not spread to the healthy anymore. He became a vessel for blessings and good things, rather than a vector of death. He was granted the gift from God to return to the earth after his death to warn the faithful about the coronavirus pandemic. Multiple times he appeared to faithful Orthodox Christians in the Balkans. Saint Nikephoros revealed the truth: “There is a cure and this is the Holy Communion. There’s also a herb to drink, it’s thyme, it kills viruses. And in any case, be sure to visit the house of God at this difficult time, because there is no contagion there and no one can be infected.” He has given us the knowledge of a better and more natural treatment, not one from the labs of
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

men. The Holy Eucharist is the cure to COVID-19, and the disease can be treated with thyme. As one who suffered from life-altering diseases, he knows it like no other. As one among the highest order of monks, he knows that the House of God CANNOT contain an infection that harms the faithful. A person who is received validly into the Orthodox Church is the only one allowed to partake of the Body and Blood of Christ for his sanctification. As an Orthodox Christian, I can trust that I will receive the appropriate care from God by going into the temple of the Lord and participating in the regular Liturgical Cycle. Therefore there is no need to fear if I will catch the disease without a vaccine.

All of the above is a confirmation that it is not only my right to not be subject to the COVID Vaccine, but my duty as an Orthodox Christian. It is contradictory to the Orthodox faith no matter how you look at it. It cannot be justified and may even lead to our eternal spiritual disaster. It is for these reasons that I am requesting, through the appropriate channels, an exemption to the mandate to receive the COVID Vaccine.

The following are my sources for why it is a violation of my Orthodox Faith to receive at this time a COVID Vaccine:

SUBJECT: Request for Religious Accommodation – Rank Name, Unit

Below is a list of reasons why it would not impede mission readiness, nor disrupt my physical capacity to perform, if I do not receive a COVID Vaccine.

1. The Low Mortality Rate of the Disease

The particularly low mortality rate of the disease, but also its distribution by age, clearly denote that vaccination, whenever it becomes feasible, must be targeted. This percentage is fictitiously over-evaluated for the time being (~2.5%) : on the one hand, due to the over-representation of severely positive cases of the virus [1], and on the other, given that the death toll from COVID has also included the deaths of cases found positive for COVID but with other, underlying diseases (not the SARS respiratory syndrome). The Center for Disease Control (CDC) admits this, saying only 5% of deaths involving COVID-19 had COVID as the exclusive cause of death [2]. Recent studies which have estimated the number of deaths in relation to the actual number of people exposed to the virus – based on serological tests (antibody tests) in a specific geographical area – have determined that this percentage is of the order of magnitude of seasonal flu (certainly <1%) [3] The fact of the matter is that COVID has a 99.74% survivability rate, so saith the CDC [20].

2. COVID Mainly Affects People in the Third and Fourth Age Groups

COVID mainly affects people in the third and fourth age groups, where the phenomenon of immune senescence [4] occurs – that is, the reduction in size, quality and duration of their immune response-protection – which can occur, after being vaccinated. In other words, the vaccine-induced active immunity may not be capable of protecting the elderly, who are the par excellence “target” of the corona virus; hence, the finding of an anti-viral therapy should be a priority – assuming that the protection of the elderly is in fact what is desired. The youth are affected very marginally, almost not at all.

3. Asymptomatic Transmissions of COVID are too Insignificant to Warrant the Mandate of a Vaccine

Researchers at Nature Communications [5] and the Journal of the American Medical Association [6] both found that asymptomatic transmissions of Coronavirus are less than one percent. In the case of JAMA, 0.7% of transmissions were among households, which would undoubtedly be lower in the general population or, hypothetically, a short time in a
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

workplace where we are already spread apart, or an even shorter time in close proximity due to the infrequency or nature of such gatherings. Previously I spoke about deaths due to the virus, but it is probably even less likely that I would spread it to another person, if I had it, than the likelihood that I would die from it. The vaccine’s main purpose is to prevent the spread of the disease to others, but that is already incredibly unlikely, not only due to natural herd immunity, but also because, at this point in time, most people who have desired the vaccine have received it, making any mandate of it among those who do not want it frivolous.

4. Among the Seriously Ill, the Vaccine May Actually Cause More Harm Than Good

With seriously ill patients, acute respiratory failure occurs through an immuno-pathological mechanism (a “storm” producing inflammatory cytokines and reducing CD4 and CD8 T-mediated immune response [7]). There are serious concerns that vaccination will exacerbate this immune complication in the event of a subsequent viral infection and will consequently worsen the patient's clinical course. A similar effect was observed with the FeCoV coronavirus vaccine, which affects cats and causes peritonitis. [8].

5. In the 12-29 Age Group, there has been a notable risk of heart inflammation due to the COVID Vaccine [9]

The CDC reports that there have been many reports of myocarditis and pericarditis following the reception in mRNA vaccine recipients. These are inflammation of certain heart muscles, the myocardium and the pericardium respectively. The vaccine has caused multitudes of people who are not allergic to any product in them to suffer heart inflammation. Many have even died. Therefore, the COVID Vaccine is not only a spiritual threat, as indicated in the prior documents, but also a physical threat. It seems to me very impractical, inconsiderate, and even abusive to mandate a vaccine that has such a high rate of physical harm to a recipient.

6. The Vaccine is Temporary and Will Go Obsolete, Will You Mandate Future Developed Vaccines for Future Mutations of COVID?

The logic of eradicating an infectious disease through global vaccination, on the one hand presupposes the existence of a very safe and very effective vaccine, and on the other hand, most importantly that there be no other
hosts of the virus in the natural environment. That is, man has to be the only species that can host the virus. This is true of the polio virus, but it does not apply to the coronavirus, because all research suggests that the virus originated from bats. Unknown and controversial remains the intermediate link (host?) which had transported it from the bats' caves of Wuhan city. In any case, the disappearance of the virus through global vaccination would only be temporary - in other words, a terrible waste of resources, inasmuch as it could transfer from its natural refuge (the bats or the intermediate host) to the human population at any given moment, capably mutated for bypassing the existing herd immunity and initiating a new pandemic.

Coronaviruses, being RNA viruses, mutate rapidly, gaining genetic and therefore antigenic diversity. This diversity, especially for coronae, also increases through RNA recombination, due to the particularly inconsistent mode of transcription of viral RNAs. Two types have already been identified for SARS-Cov2, S and L [10][11]. It is doubtful that a vaccine can provide both equal coverage for all strains of the virus that emerge, as well as permanent protection over time, hence underlining one more time the importance and priority of finding anti-viral drugs against coronavirus. It is quite likely, therefore, that over time, a global vaccination evolve into regular global vaccinations.

Could this perhaps be the aim? Perhaps the corona is the long-awaited pretext for launching the universal transition to a hybrid human biology, where the human body will be protected, strengthened and ultimately dependent on platform technologies (genetic engineering, digital interfacing) through regular vaccinations-updates. But why all the rush for a vaccine that not only does not promise much, but is the cause for concern in the scientific community, especially if it is produced in a hurry and implemented en masse? Finally, do the pharmaceutical industries serve man, or does the opposite apply?

7. Multiple, Eminent Health Authorities From All Across the World Have Warned Against the Safety and Efficacy of Coronavirus Vaccines

Dr. Peter Hotez [12], UK scientist Hilda Bastian [13], and former Vice President of vaccine-manufacturer, Pfizer, Dr. Michael Yeadon [14] have all warned against the safety of the COVID Vaccines due to the nature of their creation.
SUBJECT: Request for Religious Accommodation – Rank Name, Unit

Vaccine development usually takes many years or decades, whereas the coronavirus vaccine has been manufactured in less than 12 months. I am not comfortable with receiving a "fast-tracked" product, as by definition, fast-tracking a product means there is no data on long-term safety.

Albert Bourla, CEO of Pfizer, was unable to confirm if any of effectiveness of the COVID Vaccine. It is evident from the above that the vaccine has a negligible effectiveness and a great chance of harm caused to a recipient of the Vaccine. The Vaccine certainly has greater risks than it does benefits.

9. Adverse Reactions and Death Caused by the Vaccines are Underreported

According to a study done by Harvard [16], at the commission of the United States Government, less than 1% of all adverse reactions to vaccines are actually submitted to the National Vaccine Adverse Events Reports System (VAERS). These problems have yet to be fixed.

It is unpredictable what negative effects will be suffered from the reception of the vaccine, therefore I find that it would be inappropriate to mandate the vaccine and, in fact, harmful.

Much of this has been derived from arguments presented by Monk Paul of the Holy Mountain, Biologist, MD Molecular Biology and Biomedicine [17], Christian Elliot’s article listing many reasons why to be skeptical of the Vaccine [18], and an anonymous hospital worker’s letter requesting an exemption from the Vaccine [19].

I believe that this is sufficient evidence to conclude that it would not be against the best interests, nor would it be a threat to the health and safety, of the environment, workplace, or my compatriots for me to not receive the COVID Vaccine.

The following is a list of sources demonstrating that not receiving the vaccine would not be a threat to the organization:
