

Visual Display of How mRNA Vaccine Affects Cells Video — Text near the end
8.20.21

<https://articles.mercola.com/sites/articles/archive/2021/08/20/how-mrna-vaccine-affects-cells.aspx>

--- -----

Summary of his findings -

The D-Dimer test must be used for finding any new blood clots.

He is using people that have had a shot in the last 4 to 7 days

He has seen that 62% already have new clots.

The worst is yet to come...

Brains, spinal cord, heart muscles, and lung tissue do not regenerate.

The damage is permanent!

--- -----

Text on the screen near the end -

Dr. Charles Hoffe lives in Lytton, BC and wrote a letter to Bonnie Henry, Provincial Health Officer for British Columbia, after a patient dies and another six had adverse effects in response to the Co Vid shot.

Dr. Hoffe explains that there was never a case of Co Vid in their small town but that the vaccine was causing serious neurological damage and even death.

When he raised his concerns with the BC College of Physicians

they immediately implemented a gag order and reprimanded him in an attempt to intimidate and silence him.

According to Dr. Charles Hoffe, the Modern-a shot contains 40 trillion mRNA molecules.

Just 25% of these molecules remain in your arm, the rest picked up by your lymphatic system and transported around the body. Your body will then create trillions of cells of spike proteins.

Circulating in the lymphatic system, into the vascular, capillary network, turning smooth cells into rough, spiked cells that more easily clot.

Action4Canada has heard from other doctors in the Interior who are reporting the same adverse reactions and or have spoken out. The Interior Health is either fining or firing them. This is a very serious matter.

Since then, Dr. Hoffe has been interviewed by numerous independent news outlets, and recently interviewed by Robert F. Kennedy Jr. on Defense Health Network.

We are at such a dystopian point in our history that real science is fringe and only state

science is true.

Please note that Dr. Hoffe explains his research and findings that are in accordance with numerous others leading in the medical field who have expressed the same concerns regarding the dangers around the spiked proteins and harmful blood clots.

However, there are no long term studies to determine the extent of this phenomenon. Yet, hundreds of thousands have been adversely injured and or died allegedly from the shot. Governmental agencies disagree with this and have gone to extremes to silence these voices.
