Donald Trump For President Trump Shuts Down Fake News Hack Kristen Welker: "You're Crooked" and Walks Out President Trump had enough of NBC's biased Kristen Welker during an exclusive barn interview in Wisconsin and didn't hold back. Trump looked her straight in the eyes and unloaded on the dishonest media: "Your elections in this country are like a third world country. Your elections are crooked and you're crooked and Meet the Press is crooked. So as ABC and CBS and CNN. You one-sided crooked network. So let's call it quits because I've had enough." Interview over in 90 seconds!!!

As Trump stood up to leave, Welker whined: "Please, I traveled all the way to Wisconsin!" Trump fired back without missing a beat: "I've sat in the rain with you for an hour on and off in the rain. And I've given you enough time. You ought to straighten out your press because a country can never be great with a dishonest press." Trump then walked off, leaving the liberal reporter scrambling. This moment shows exactly why Americans love Trump—he calls out the crooked media to their faces instead of playing their rigged game. No wonder the fake news media hates him. **He's the only leader with the guts to fight back and put America first. Best president ever.**

Dr. Steven Greer has issued a stark warning. "The longer we allow free energy technology to remain hidden, the more billions of people suffer as a result." Not millions. Billions. The technology exists. It has existed for decades. **It is being suppressed. Intentionally. Deliberately.**

Free energy. Zero point energy. Power from the vacuum of space. Unlimited. Clean. Inexpensive. The kind of technology that would end fossil fuels. End energy poverty. End wars fought over oil. The kind of technology that would change everything.

Greer says the government has it. The military has it. Black budget programs have been reverse engineering it from non human craft. They have working prototypes. They have operational systems. They are not sharing.

The cover up is not about aliens. It is about power. Energy is power. Free energy means free people. The people who control oil and gas do not want free energy. The people who run the grid do not want competition. The people in power do not want to give it up. Billions suffer. The technology is hidden. Greer is speaking. The question is whether anyone is listening.

Jason Gleaves Disclosure Day Movie Review

I just watched Steven Spielberg's latest film, "Disclosure Day," and I have to say—what an incredible achievement. Spielberg and his team have crafted something truly special here. **Accuracy and Authenticity** What struck me most was the film's authenticity. I'd estimate about 70% of the content accurately reflects documented UFO/UAP cases and real experiences. As someone familiar with this subject, there were numerous moments throughout the movie that resonated deeply on a personal level. **Timing is Everything.** The timing of this release feels significant—perhaps even intentional. With the recent declassification of U.S. UFO/UAP footage and documents, this film arrives at a cultural moment when these conversations are finally entering mainstream discourse. I don't believe that's a coincidence. **Thoughtful Approach to Complex Themes** I particularly appreciated how Spielberg handled the religious and philosophical dimensions of the subject matter. He approached these sensitive topics with nuance and respect, which isn't easy given how polarizing they can be. **Final Verdict** I strongly encourage everyone to see this film. Whether you're a skeptic, a believer, or simply curious, "**Disclosure Day**" offers a **compelling cinematic experience that's both entertaining and thought-provoking.** It's rare to see a major Hollywood production tackle this subject with such care and credibility. Spielberg has once again proven why he's a master storyteller. Jason Gleaves, Ufonly.

I've found Chiropractors to be more open to new healing technologies than MDs. A few years ago I injured my back and it was very painful especially when I wanted to bend over. A friend recommended going to a chiropractor who uses 'Soft Wave'. With only one 10 minute application, the pain was relieved except when bending over. So I went again and after the 2nd 10 minute application I could bend over without pain and have had no back trouble since even though I'm 87 years and have both osteoporosis and scoliosis and do lots of stooping, and getting up and down when weeding. Yea! 🧑🏻‍🌾 Janet Lee

FBI & ICE Raid Luxury Pharma Compound, Uncovering Massive Human Trafficking Ring

Read more <https://purpose.lifestruepurpose.org/?p=71569>

Federal agents swarmed the "Valerius Pharma" compound at dawn today, smashing through reinforced gates in a lightning-fast raid. Inside this sterile, multi-billion dollar facility, officers discovered more than just research equipment. They found **hidden underground chambers housing dozens of terrified children. How deep does this corruption go, and who is the shadowy CEO?** The scene inside those high-security vaults was absolute chaos, and the evidence left behind suggests this operation reaches far higher than just the local lab directors. If you think **the pharma giants are only selling medicine, you have no idea what's really going on behind those iron gates.**

When John D Rockefeller & Andrew Carnegie partnered to make poisonous petroleum based pills to make people sick and took control of mainstream Science & the medical FIELD in 1910 to BAN the acknowledgement of Energy in the body across all institutions, we as a species were set up to fail.

Dr Royal Raymond Rife announced in the 1930s that he could destroy bacteria by blasting them with Electro-Magnetic waves oscillating at Frequencies specific to each target organism. According to his supporters, Rife cured significant numbers of people infected with a number of common but dangerous infections, including typhoid, salmonella, influenza & other infections caused by parasitic organisms.

Rife found himself **under sudden & constant assault from the American Medical Association, who banned use of his beam ray to treat patients, burned down his lab & murdered his financial supporter/partner.**

In 1931, Otto Warburg won the Nobel Prize for proving that cancer cannot survive in an oxygenated cell. They buried his work for 93 years. He demonstrated that when a human cell's oxygen level drops below 35 percent, the cell has no choice but to ferment sugar to survive. This fermentation is what we call cancer. Cancer is not a genetic lottery. It is not random. It is not inherited. **It is a metabolic response to oxygen deprivation at the cellular level.** Warburg stated it clearly: deprive a cell of 35 percent of its oxygen for 48 hours, and it will become cancerous. Every single time. Without exception. **He won the Nobel Prize in Physiology in 1931 for this discovery.** He was nominated for a second Nobel Prize. He published over 500 scientific papers. His work was verified by laboratories across Europe. **Then silence.** His name was quietly removed from medical school curricula. His research was reclassified as historical rather than clinical. **The oncology industry pivoted entirely toward genetics, radiation, and chemotherapy.** The oxygen theory was abandoned. Not because it was disproven. **Because it could not be monetized.** **You cannot patent oxygen.** You cannot patent breathing. You cannot charge \$200,000 for a treatment that requires nothing more than restoring cellular respiration. **The global oncology market is now worth \$286 billion per year. It exists because they chose to treat the symptom** instead of correcting the environment. The MedBed frequency protocol restores mitochondrial function and forces cells back into aerobic respiration. When oxygen levels normalize, the fermentation stops. The cell either repairs itself or is destroyed by the immune system. This is not alternative medicine. This is the Nobel Prize-winning science they chose to forget. <https://t.me/MedBedsTechnologyNews>
