🔒 NO PROOF OF CITIZENSHIP, NO DEAL. 🔒 President Trump just laid down the law on Truth Social, and he's holding the line for the American people. He's officially opposing any renewal of the Foreign Intelligence Surveillance Act (FISA) unless it has The Save America Act firmly attached to it. **🇺🇸 The Left wants to keep rubber-stamping surveillance powers while ignoring** the most critical vulnerability in our nation: election integrity. Trump's message is crystal clear: **If a piece of legislation doesn't guarantee that only American citizens can vote in American elections, it's a non-starter.** The establishment is scrambling because Congress already shot down a short-term FISA extension this week amid a standoff over Trump's appointment of loyalist Bill Pulte as acting DNI. **Now, Trump is using maximum leverage to force Washington to fix our broken voting system. It's simple: Secure our borders, secure our ballots, and stop the games.**

Brent crude prices dropped to under \$80 by early Monday afternoon Eastern Standard Time. Roughly one-fifth of the world's oil travels through the Strait of Hormuz.

Donald Trump For President Trump Drops Fight Bonus on Marine Band — Dana White Matches It UFC boss Dana White lit up the Pat McAfee Show with a killer story from the White House UFC event. After the President’s Own U.S. Marine Band delivered an epic performance, President Trump told White he was cutting them a fight bonus. White’s response? “I’m gonna match that bonus.” Straight-up respect for the band that brought the energy. No politics, just big-league appreciation for talent that showed up and crushed it. Classic Trump move — and White backing it seals the deal.

[Group](#) **Let’s get this straight**—MH370 wasn’t just carrying passengers on a routine flight from Kuala Lumpur to Beijing. On board that plane were 20 elite semiconductor scientists and engineers, transporting superconductivity microchips worth an estimated \$800 billion each. That’s a staggering \$16 trillion worth of advanced technology—technology that could revolutionize everything from antigravity propulsion systems to advanced military weapons, super AI, and even cloaking technology that could hide entire planets from detection. ... And that’s why this wasn’t just a tragic crash. It was a planned military operation to infiltrate the deepest levels of corruption within the U.S. military-industrial complex, the CCP, and their global banking allies. The disappearance of MH370 was part of a larger, covert war being waged by white-hat military operators within the U.S., directed by figures like Admiral Rogers, General Joseph F. Dunford, and General Flynn. **Be sure and read this whole article. Some of us**

The \$60 Million Shadow: How One Man Sold Out Ohio in Just Seven Days

Read orre <https://purpose.lifestruepurpose.org/?p=76760>

The FBI officially convicted former Ohio House Speaker Larry Householder for orchestrating a massive, dark-money conspiracy. Investigators proved Householder pocketed a staggering \$60 million in corporate bribes from a major energy giant. Just one week later, he ruthlessly rammed through a controversial \$1.3 billion taxpayer-funded nuclear bailout law. But as handcuffs clicked around his wrists, a hidden, unredacted ledger found in his briefcase blew the entire conspiracy wide open. Who is the unnamed Washington power broker listed on line one? The courtroom went dead silent when the prosecution revealed that encrypted ledger. Householder thought he burned every bridge, but a single offshore bank account routing back to Capitol Hill changes everything. The FBI is moving in on the next target right now.

META AND MIKE ROWE LAUNCH A \$115M TRADE ACADEMY: FREE TRAINING AND A GUARANTEED JOB FOR EVERY GRAD

Meta and Mike Rowe have launched America's Workforce Academy, a \$115 million program that trains workers for skilled trades — welding, plumbing, electrical work, fiber technology — at zero cost to the trainee, with a guaranteed full-time job at the end. The program is described as the largest private-sector skilled trades commitment with guaranteed job placement in U.S. history. Pilot cities: Baton Rouge, Columbus, Indianapolis, and Houston.

The structure is built to remove every barrier: no tuition, living expense support during training, NCCER certification, and a guaranteed job offer — not a resume referral, a guaranteed placement. Rowe put it plainly: *Workers are actually paid to learn. There is zero cost to them, no college debt and a fast certification, with a guaranteed job on the other end.*

Donald Trump For President Deep State Bombshell: Declassified Docs Expose 2019 Trump Impeachment as a Rigged Coup Plot

Trump supporters are fuming after DNI Tulsi Gabbard dropped declassified documents revealing how the 2019 Ukraine whistleblower complaint was rushed through without basic checks. The memo shows the so-called whistleblower had zero firsthand knowledge of President Trump's July 2019 call with Zelensky, admitted it upfront, yet the intelligence community's inspector general pushed the narrative anyway. They interviewed just four people: the whistleblower, a buddy tied to the 2017 Russia hoax and Peter Strzok, and two character witnesses with no direct info. No deep dive, no standard procedures—just enough to fuel impeachment over Trump's push for Biden family scrutiny and Giuliani's Ukraine role. Gabbard's release, paired with criminal referrals to the DOJ, lays bare what many called a **premeditated hit job. It wasn't urgent concern. It was weaponized process to overturn an election.**

The reaction online is raw: "Treason." "Prison time." "Coup by deep state actors." One viral post captured the gut punch: "I'm sick to my freaking stomach... These people belong in prison for this shit." Years later, fresh transparency confirms what skeptics long suspected. The real scandal wasn't the phone call—it was the machine that tried to bury a presidency.

California farmers are deploying UV-light robots at night to eliminate pests — no chemicals, no pesticides, just light.

California farmers are deploying UV-light robots at night to eliminate pests — no chemicals, no pesticides, just light. Farms in California are stepping into the future. Instead of using sprays, growers are now sending autonomous robots into fields after dark to protect their crops naturally. These robots use UV-C light to target harmful pests and fungal disease, leaving zero residue on food. They move through crop rows on their own, cover up to 100 acres each, and even use a built-in vacuum to gently remove insects from leaves without harming the plant.

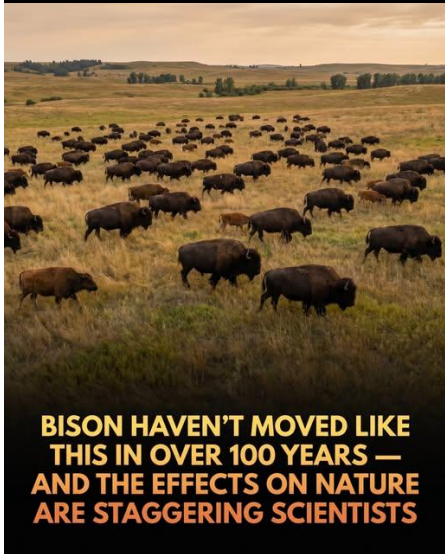

Developed by TRIC Robotics, the Luna and Eden machines run all night, adjust to uneven ground, and collect real-time data on crop health. The company recently raised \$5.5 million to expand across California and bring this technology to more farms.

Cleaner food. Healthier soil. Smarter farming. This is what the future looks like.

BISON HAVEN'T MOVED LIKE THIS IN OVER 100 YEARS — AND THE EFFECTS ON NATURE ARE STAGGERING SCIENTISTS

Hashem Al-Ghaili · Follow

Bison are orchestrating one of the greatest ecological comebacks in North American history.

For over a century, the American bison of the Great Plains and Yellowstone National Park were fractured, their massive herds divided into isolated subpopulations by roads, fences, and human-driven habitat disruption.

But in a stunning wildlife triumph, these artificial boundaries have dissolved. Without human intervention, the bison are instinctively reuniting and reclaiming ancient, cross-boundary migration routes that had been dormant since the early 20th century. **This historic movement is not just a reunion; it is a collective remembering of ancestral paths, signaling a dramatic shift in how these legendary creatures interact with their native landscape. As these unified herds march across the grasslands, they act as ultimate ecosystem engineers. The heavy stomping of their hooves breaks up packed soil, allowing native seeds to take root, while their grazing patterns stimulate the growth of nutrient-rich plants. Additionally, the depressions left by their dust wallows capture rainfall to create temporary watering holes for other wildlife, distributing vital nutrients across the plains. By allowing bison to roam freely and reclaim their historic migration corridors, nature is proving that wild ecosystems thrive best when their original caretakers are given the space to lead the way.**
