**Real Americas Voice** Edna Diamante ·

Dwight Eisenhower built NATO. He was its first Supreme Allied Commander, the general who held the line against Soviet expansion when Europe lay in ruins. And in 1951 he said something his modern admirers conveniently forget. He warned that if American troops were still parked in Europe a decade later, the whole project would have failed. He meant it. The deployment was supposed to be a temporary shield, a few years of cover while shattered allies rebuilt. Then they were supposed to carry their own defense. That was the deal.

That was 75 years ago. The man who created the alliance never intended for the United States to become Europe's permanent bodyguard. Yet that is exactly what happened. As recently as 2023, America was footing nearly 69 percent of NATO's total defense spending. In 2014, only three of 28 member nations bothered to hit the modest 2 percent target they had all agreed to.

**The Founders saw this coming. Hamilton argued in Federalist No. 11 that a strong, independent America should never be the junior partner in its own security, beholden to the old world. Washington warned against permanent entanglements that drain a free people.** A nation that cannot defend itself is not

every honest leader knew. Enough. Pay your share, or stand on your own. Europe did not like hearing it. But the results speak for themselves. By 2025, all 32 NATO members are projected to meet the 2 percent target, and they have committed to far more. Decades of polite requests accomplished nothing. One president willing to be unpopular accomplished what others would not even attempt.

**Eisenhower was right. America protects. It does not protect permanently. It is past time our allies stood on their own feet, and past time American taxpayers stopped carrying a burden the architect of NATO himself said should have ended generations ago.**

**Bill Brindley** May 27 at 7:46 AM ·

**Trump uses immigration procedures as a tool** The Trump administration just opened two new fronts in the deportation push: mass-style courtrooms designed to clear cases by the hundred, and a fresh DHS directive aimed squarely at the immigration lawyers filing asylum claims. **Front one — the courts: The Department of Justice has rolled out "mega master" hearings, with as many as 100 illegal aliens scheduled in a single session. Judges have been instructed to deny bond, dismiss cases, and order removals as quickly as the law allows.** Roughly 600 military lawyers have been deputized as temporary immigration judges to chew through the backlog of over 3 million active cases.

**More than 100 judges have been fired** since last year, with 150-plus new hires brought in to replace them.

**Illegals who skip a hearing or fail to respond now face immediate removal.**

**Front two — the lawyers: A May 26 memo from DHS General Counsel James Percival ordered ICE attorneys to aggressively pursue administrative fraud cases against immigration lawyers accused of filing false asylum claims. Percival argued it has become "standard practice" for attorneys to claim "virtually every illegal alien" faces persecution back home.** Civil penalties run up to \$4,730 per fraudulent document on a first offense and \$11,823 on repeat violations. Fraud findings can also be referred for disbarment from

The memo invokes Trump's March order targeting **"Big Law" firms bringing** what the White House calls **"frivolous" immigration litigation**. The numbers: According to DHS, nearly 3 million illegal aliens have left the country in Trump's first year back in office — roughly 675,000 through formal deportation and an estimated 2.2 million through self-deportation. **Big picture: The administration figured out what slowed down Trump 1.0: process. So this time, they're using process as the weapon. Faster hearings mean faster removals. Squeezing the lawyers means fewer claims gumming up the system in the first place.**

 The Justice Department is moving to obtain the names, addresses, and contact information of poll workers and ballot counters from the 2020 election in Fulton County, Georgia.

**Bill Brindley** Trump's building midterm momentum

A federal judge just refused to block President Donald Trump's mail-in voting executive order – handing him a third straight win in a methodical campaign to clean up how America votes. The details: On Thursday, U.S. District Judge Carl Nichols declined to halt Trump's executive order, which tightens the process around mail-in voting, ruling the challenge premature and leaving the order in force. What does Trump's order do? It directs DHS to use Social Security data to flag noncitizens and build a federal citizenship voter list. Critics sued to stop it; the order stands while litigation continues.

**Win 2, the Court:** In April, the Supreme Court ruled 6-3 in *Louisiana v. Callais* that states can no longer use the Voting Rights Act as a reason to draw congressional districts around race. The ruling reset the rules nationwide and put up to 19 minority-drawn House seats back on the table this election cycle – and up to 140 seats down the line. Win 2, the maps: The Callais ruling cleared the way for a redistricting wave. Texas drew five new GOP-friendly seats, with Missouri, North Carolina, Ohio, and Utah following. Democrats fired back with their own redistricting moves, but the Cook Political Report projects Republicans will net five to seven House seats from the new maps alone. Big picture: At its core, this isn't just about November maps. President Trump is redrawing the next decade of American elections right now.[Source: Daily Caller]

**Glenn Stanfield YOU GOTTA READ THIS! ....Oklahoma is the only state that Obama did not win even one county in the last election...** While everyone is focusing on Arizona 's new law, look what Oklahoma has been doing!!!! An update from Oklahoma : **Oklahoma law passed, 37 to 9 an amendment to place the Ten Commandments on the front entrance to the state capitol.** The feds in D.C., along with the ACLU, said it would be a mistake. **Hey this is a conservative state, based on Christian values...! HB 1330** Guess what..... Oklahoma did it anyway.

**Oklahoma recently passed a law in the state to incarcerate all illegal immigrants, and ship them back to where they came from unless they want to get a green card and become an American citizen. They all scattered. HB 1804.** This was against the advice of the Federal Government, and the ACLU, they said it would be a mistake. Guess what..... Oklahoma did it anyway. **Recently we passed a law SB 1102 to include DNA samples from any and all illegal's to the Oklahoma database, for criminal investigative purposes.** Pelosi said it was unconstitutional Guess what..... Oklahoma did it anyway.

**Several weeks ago, we passed a law, declaring Oklahoma as a Sovereign state, not under the Federal Government directives. Joining Texas , Montana and Utah as the only states to do so. More states are likely to follow: Louisiana, Alabama, Georgia, Carolina's, Tennessee, Kentucky, Missouri, Arkansas, West Virginia, Mississippi and Florida. Save your confederate money, it appears the South is about to rise up once again. HJR 1003**

The federal Government has made bold steps to take away our guns. **Oklahoma, a week ago, passed a law confirming people in this state have the right to bear arms and transport them in their vehicles. I'm sure that was a setback for the criminals** The Liberals didn't like it -- But... Guess what..... Oklahoma did it anyway.

Just this month, **the state has voted and passed a law that ALL drivers' license exams will be printed in English, and only English, and no other language.** They have been called racist for doing this, but the fact is that ALL of the road signs are in English only. If you want to drive in Oklahoma , you must read and write English. Really simple. By the way, the Liberals don't like any of this either.

**After Hurricane Katrina, New Orleans' learning institutions became the first all-charter system in the nation and now outpaces most schools in math and reading growth.**

## Wyoming Nature & Memories

**BREAKING: A Wyoming farmer has just transformed an entire field into a bold message that's turning heads across the Cowboy State...** 🍏👨🌾  
**"YOU CAN'T EAT DATA."**

**No speeches. No press releases. Just acres of Wyoming farmland making a statement visible from the sky.**

As more large-scale data center projects are discussed across rural America, many Wyoming residents are asking an important question: What happens when productive farmland and open space give way to industrial development?

For generations, Wyoming's ranches, farms, and wide-open landscapes have supported local communities, produced food, and defined the state's unique way of life. From cattle ranching and hay production to family-owned farms, agriculture remains at the heart of Wyoming. Now, a growing debate is taking shape: Should Wyoming prioritize farmland and ranchland, or make room

for more data centers and industrial growth? What do YOU think? 🙌

## The Data Center Apocalypse

**Situation Just Got Scary (It's not a conspiracy anymore)**

## Tech X · Follow 📌 The AI Boom Is Running Into a Wall of Public Resistance 📌

For years, AI was marketed as a clean, digital revolution. But behind every chatbot, image generator, and AI model sits a growing network of massive data centers consuming enormous amounts of electricity, water, and land. **Across the United States, communities are increasingly pushing back against new AI data center projects. Residents are raising concerns about rising power bills, water consumption, noise pollution, environmental damage, and the fact that many of these billion-dollar facilities create relatively few permanent jobs.** The backlash is no longer isolated. Reports show that **tens of billions of dollars worth of data center projects have been delayed, blocked, or challenged by local communities and activist groups. Some states have even considered moratoriums on new developments, while public opposition has grown so strong** that recent surveys found many Americans are more comfortable living near a nuclear power plant than a new AI data center.

**Environmental activist Erin Brockovich has also joined the debate, warning that the rapid expansion of AI infrastructure carries real-world costs often hidden behind the convenience of digital services.** As AI companies race to build the computing power needed for the next generation of artificial intelligence, a **bigger question is emerging: Who should bear the environmental and economic costs of powering the AI future** — tech giants, or the communities hosting their infrastructure?

## I Grew up in Nebraska 📌 Life in Nebraska

Nebraska looked at AI data centers and said: "Hold up... y'all realize those things use actual electricity, right?" 🍏⚡👨🌾

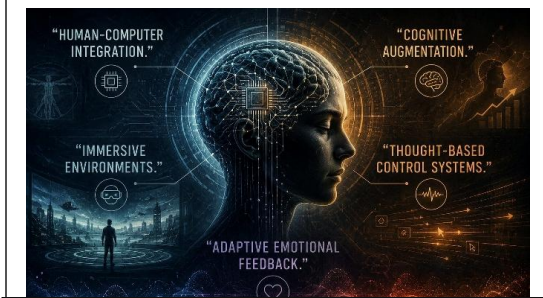

Somewhere in Lincoln, a group of officials saw the power bill projections and immediately hit the brakes harder than a farmer spotting a deer on a back road at midnight. Meanwhile the rest of the country is racing to build giant server farms... and Nebraska is over here like: "Maybe let's not turn the whole state into one giant space heater." 🍏👨🌾  
 Cornfields 🍏 common sense. Honestly, Nebraska keeping its priorities straight: ✓ Agriculture ✓ Small towns

✓ Friday night football ✗ The robots taking over 400 acres The AI probably could've survived anywhere... but it was never prepared for Nebraska practicality. 🍏👨🌾

### The StoicWay

**BREAKING :** 🇺🇸 Robert F. Kennedy Jr. has raised concerns about the rapid expansion of large-scale data centers across the United States, warning that their growth could carry potential environmental and public health implications. These facilities, which support cloud storage and digital infrastructure, are becoming increasingly widespread as global data demand continues to rise. According to Kennedy, the long-term impact of such developments may include increased environmental strain, higher energy consumption, and possible exposure concerns linked to electromagnetic fields and industrial activity around these sites. He has described the potential risks as “grave injuries,” calling for closer scrutiny of their expansion. The issue has sparked broader debate about how to balance technological advancement with environmental responsibility and community health. As data infrastructure continues to grow, discussions around regulation, sustainability, and safety are expected to intensify.

**Medicare Fraud Scheme allegedly uses foreign call centers** and fake billing networks to obtain Medicare numbers from elderly Americans, followed by fake doctor orders and coordinated kickback schemes with providers and pharmacies to bill for unnecessary services. One company, **HealthSplash**, is said to have submitted up to \$1 billion in fraudulent claims, with its owner **Brett Blackman** accused of stealing around \$450 million in taxpayer funds and publicly displaying wealth in music videos and luxury assets. Separate reporting cited by CBS News found hundreds of hospices in Los Angeles County showing multiple fraud indicators. Critics say the scale of abuse suggests a broader nationwide issue and call for accountability not only for executives but also for officials overseeing the system. @SGTnewsNetwork

## Donald Trump For President

### BROOKE ROLLINS LAUNCHES GREAT AMERICAN COTTON PLAN TO FIGHT SYNTHETIC PLASTICS IN CLOTHING

Agriculture Secretary Brooke Rollins announced a major new initiative tying into the MAHA movement.

“The MAHA movement doesn't stop with what we eat — it's also about what we wear,” Rollins said.

She highlighted decades of failed policy: “For decades America offshored textile jobs and allowed foreign synthetic, plastic-based materials to take over the clothing market.” Rollins continued: “Together with Secretary Kennedy, the Great American Cotton Plan puts American-grown cotton first again: supporting our farmers, strengthening U.S. manufacturing, and giving families a natural choice.” **We can help by refusing to buy clothing made from synthetic materials.** Janet Lee

**The sun does not cause cancer - sunscreen does.** For 40 years, the dermatology industry has told you to fear the Sun. Cover up. Stay indoors. Apply chemical sunscreen every two hours or risk death. .... During that same 40-year period, skin cancer rates have increased by 300%. The more sunscreen the population uses, the more cancer it gets. This is not a paradox. It is a result. .... In 2019, the FDA published a study showing that the active chemicals in sunscreen, oxybenzone, avobenzone, octocrylene, and ecamsule, **absorb directly into the bloodstream** within hours of application. Oxybenzone was detected in the blood at concentrations 400 times above the FDA's own safety threshold. It is an endocrine disruptor. It mimics estrogen. It has been linked to hormone-dependent cancers, fertility problems, and developmental issues in children. .... You are rubbing a hormone-disrupting chemical into your skin to protect yourself from the one thing your body was designed to absorb. .... The Sun is not your enemy. It is your primary source of Vitamin D, a hormone so critical that its deficiency is linked to cancer, depression, autoimmune disease, cardiovascular failure, and cognitive decline. 42% of the American population is Vitamin D deficient. In northern climates, that number exceeds 70%. .... They created a Vitamin D deficiency crisis by teaching you to fear the Sun. Then they sold you Vitamin D supplements made from lanolin extracted from sheep wool. A \$2 billion industry built on a problem they manufactured. .... Ancient civilizations worshipped the Sun because they understood it was the source of biological power. Modern civilization hides from it because a sick, deficient population is easier to control than a healthy one standing in the light. <https://t.me/MedBedsTechnologyNews>

**🌟 SENATOR DANIEL WHITAKER ARRESTED IN BOSTON PENTHOUSE RAID: \$19.2 BILLION CARTEL MONEY LAUNDERING EMPIRE EXPOSED**

At 4:23 a.m., federal agents stormed **Senator Daniel Whitaker's** luxurious Boston penthouse and uncovered a **hidden steel staircase leading to a soundproof underground command center.**

Inside: encrypted servers, financial dashboards, satellite uplinks, and evidence of a staggering \$19.2 billion cartel money laundering network that funneled narcotics profits through shell companies, real estate, and political connections across multiple states.

The once-respected senator — known for speeches on economic reform — is accused of being the architect who used his office to protect and profit from the empire.

Simultaneous raids from Miami to Las Vegas seized tons of narcotics, millions in cash, and dismantled dozens of shell companies.

They turned political power into a cartel shield.

Federal agents just tore it down.

The senator's fall is complete.

The empire is collapsing.

Justice has finally reached the penthouse.

A HUNDRED TONS OF SAND HEATED TO 500°C STORES SIX MONTHS OF ENERGY—ENOUGH TO HEAT ENTIRE CITIES THROUGH ARCTIC WINTERS USING ONLY SUMMER SUNLIGHT

### Engineering Facts

**Finland's sand battery system uses a simple but powerful idea: store renewable energy as heat inside a large insulated mass of sand.** During sunny or windy periods, excess electricity can be converted into heat and held for long periods. The system heats industrial-grade sand to around 500°C, allowing it to retain thermal energy for months. That stored heat can later be released through heat exchangers to warm water for district heating systems. This approach is especially useful in cold northern regions where winter heating demand is high and sunlight is limited. By saving summer renewable energy for winter use, sand batteries help address one of renewable energy's biggest challenges: long-term storage.

Compared with lithium battery storage, sand batteries are described as cheaper, longer-lasting, and less prone to degradation. Their simple materials and long lifespan make them attractive for large-scale heating infrastructure.
