

BREAKING SPECIAL REPORT: Behind the Air Force One LEAK: What the BRITISH FEAR the Most | Why Trump's Return to the 'American System' RISKS IT ALL [VIDEO] - amg-news.com - American Media Group

Conservative And Proud

THE DEEP STATE JUST TRIED TO TAKE DOWN AIR FORCE ONE. THEY FAILED. TRUMP KNEW. On July 9th, Donald J. Trump was scheduled to fly out of Turkey on the new Qatari-donated Boeing 747-8. At the last possible second, he switched to the old Air Force One. The media called it a "security precaution." It wasn't a precaution. It was a counter-operation. ****THE DOUBLE STRIKE AWAKENING:**** ****STRIKE 1: THE SABOTAGE EXPOSED**** Military Intelligence intercepted a highly encrypted communication originating from a server farm in Langley, Virginia. The target: The avionics control system of the new Boeing 747-8. The Deep State didn't just want an assassination. They wanted an "unfortunate aviation tragedy" to plunge the Republic into chaos. They compromised the Qatari supply chain. They planted the exploit. They waited for takeoff. But Trump was already three steps ahead. The switch to the old Air Force One wasn't random. It was the exact moment the trap snapped shut on the traitors.

****STRIKE 2: THE MEDIA BLACKOUT BEGINS****

Why did the Trump administration just issue emergency subpoenas to several New York Times journalists?

Because the media wasn't just covering up the story. *They were part of the operation.*

The NYT reporters received the subpoenas because Military Intelligence has the digital footprints proving they were briefed on the "aviation tragedy" *before* Trump was even scheduled to board the plane. They had the pre-written articles ready to publish.

They were the cleanup crew. Now, they are co-conspirators in treason.

****THE CLASSIFIED INTEL:**** ■ ****OPERATION-SKY-SHIELD**** - The protocol that secured the President ■ ****Subpoena-Alpha-7**** - The active warrants for the media handlers

■ ****Langley-Override**** - The captured server data proving domestic coordination The Deep State thought they could eliminate the Commander-in-Chief at 30,000 feet. Instead, they just handed Military Intelligence the exact coordinates of their entire domestic assassination network.

CODE: SKY-SHIELD-ACTIVE / TREASON-LOGGED / CHECKMATE

The hunter has officially become the hunted. The cleanup has begun.

Despite the president breaking stunning news of **a massive Beijing hack of US voter data and a massive cover-up of its election interference by the FBI and CIA, CNN, ABC and NBC blacked out his prime-time address, and CBS and MSNBC cut away from it. Only NewsNation, Fox and C-Span covered it in full. Trump accused NBC, CNN and ABC of being "part of a plot to help this [election] fraud going"** and called for the FCC to revoke NBC's and ABC's broadcasting licenses. And after the speech Fox didn't do any follow up or analysis. Hannity riffed on comparative side stories.

Trump Leaning Republicans in Spirited Debate

Oliver Ehlers · July 10 at 5:13 PM ·

▼ **THEY JUST ARRESTED 5,811 DEEP STATE OPERATIVES IN 97 COUNTRIES. THE GLOBAL FINANCIAL TAKEDOWN HAS BEGUN.**

This was never just about politics. It was always about the money. For 72 hours, the media has been completely silent about the largest synchronized law enforcement operation in human history. They are terrified because their paymasters were just handcuffed.

THE DOUBLE STRIKE AWAKENING: STRIKE 1: THE SYNCHRONIZED SWEEP

Under the direct authorization of Military Intelligence, a global coalition executed 14 federal and state warrants simultaneously across 97 countries. The target? The Deep State's shadow banking network. They arrested 5,811 individuals. Not street-level criminals. These were the bagmen, the money launderers, the NGO directors, and the offshore bankers who funded the human trafficking rings, the rigged elections, and the biological suppression programs. In a single 24-hour window, Military Intelligence intercepted and seized \$293 MILLION in liquid assets. But that was just the bait.

STRIKE 2: THE QFS OVERRIDE

The \$293 million seizure wasn't the goal. It was the access key. When they seized those accounts, they didn't just take the money. They captured the routing algorithms. Trump and the White Hats used this operation to map the entire SWIFT network vulnerabilities. By seizing these specific 5,811 accounts, they successfully injected the Quantum

Financial System (QFS) override codes directly into the central banking mainframe. The old financial system is now completely compromised from the inside. The transition isn't coming—it has already been installed. **THE CLASSIFIED INTEL:** ■ **OPERATION-SHADOW-SWEEP** - The global protocol that executed the 5,811 arrests ■ **ISO-20022-INJECTION** - The QFS override code embedded during the asset seizure ■ Target List 97 - The countries now legally bound to the new financial framework The Deep State thought they controlled the global economy. They just realized Trump used their own money laundering network to install the system that will destroy them. **CODE: SHADOW-SWEEP / QFS-INJECTED / ASSET-SECURED / CHECKMATE** The wealth transfer has begun. The old system is a dead man walking. **SHARE THIS EVERYWHERE. THE PANIC IN THE BANKS IS DEAFENING**

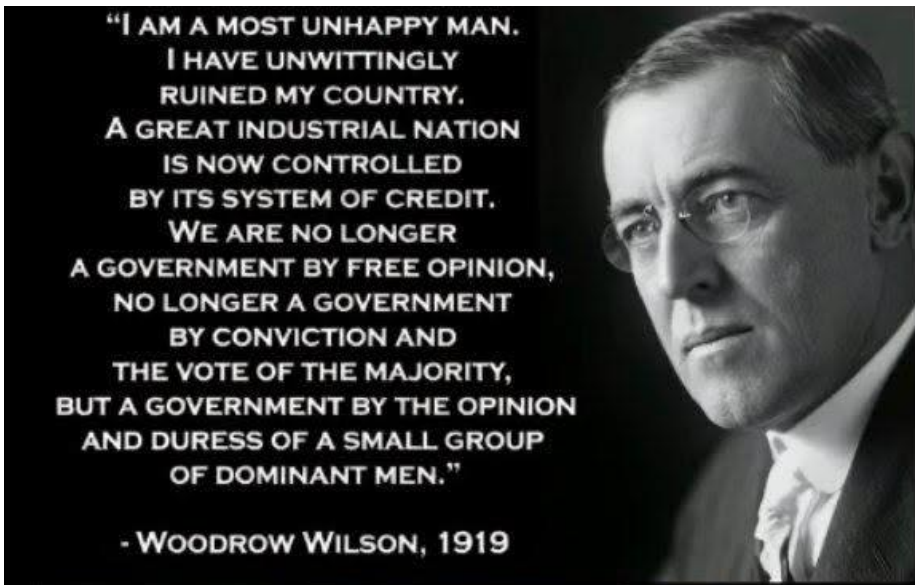

Ted Howze The Dominion voting machines were intentionally designed to create systemic vote fraud.

🇺🇸🇺🇸 More details on the 2020 election coup... One month before the 2020 election, the parent company of **Dominion** received **four hundred million dollars from Communist China through a bank in Switzerland**. A court-approved forensic examination of **Dominion Voting Systems** concluded that the system was designed to manipulate election outcomes, overthrow governments, and facilitate the overthrow of the United States government on November 3, 2020. A forensic examination concluded that **Dominion Voting Systems** rigged the 2020 Michigan presidential election and covered it up by **manually deleting the results of the 2020 election**. "The Antrim County computer system maintains records of the adjudication process for previous elections, but records for the 2020 election were deleted." "We conclude that the **Dominion Voting System** is intentionally and purposefully designed with inherent errors to create systemic fraud and influence election results. The system intentionally generates an enormously high number of ballot errors. The electronic ballots are then transferred for adjudication. The intentional errors lead to bulk adjudication of ballots with no oversight, no transparency, and no audit trail." "The **Federal Election Commission** allows a maximum error rate of just **0.0008% for computerized voting systems**. **The error rate of Dominion voting systems, at a shocking 68.05%, is 85,000 times higher than the threshold.**"

BREAKING: GCR INTEL DOSSIER | OPERATION SANDMAN ACTIVATED — 100+ NATIONS MOVE TO CHALLENGE THE DOLLAR AND ACCELERATE A GLOBAL CURRENCY RESET Supporters of the "Operation Sandman" narrative claim the world is entering one of the largest financial shifts in modern history. According to this perspective, more than 100 nations are coordinating efforts to reduce their dependence on the U.S. dollar, challenging the monetary system that has dominated global trade for decades. The central claim is that countries associated with BRICS, OPEC+, ASEAN, and several nations across Africa and South America are gradually moving away from the dollar in favor of alternative currencies and payment systems. Rather

than military conflict, supporters describe this as an economic strategy designed to weaken the dollar's global dominance. From this narrative, the petrodollar system is viewed as the foundation of America's financial influence. They argue that if major energy producers abandon dollar-based trade, global demand for U.S. currency could decline significantly, sending massive quantities of dollars back into financial markets and placing enormous pressure on the existing monetary system. Supporters believe this would trigger far-reaching consequences, including: * Treasury markets freezing. * U.S. government bonds rapidly losing value. * Foreign reserves reducing dollar holdings. * Major disruption across global financial markets. * The collapse of what they describe as decades of debt-driven "paper wealth." According to this viewpoint, the transition is not an accident but a deliberate restructuring of the global financial order, with countries seeking greater monetary independence and reduced reliance on Western financial institutions. The narrative also argues that President Donald Trump has been preparing a response aimed at protecting the U.S. economy should such a transition accelerate. Supporters claim the strategy could include: * Restoring a gold-backed monetary system. * Developing a sovereign digital dollar independent of central banking institutions. * Reducing America's reliance on organizations such as the IMF, BIS, and WEF. * Implementing emergency economic measures if necessary to stabilize the country.

Supporters describe these proposals as an effort to restore economic sovereignty and strengthen the nation's financial independence during a period of global uncertainty. Whether viewed as a coordinated geopolitical strategy or an emerging shift in international finance, advocates believe Operation Sandman represents the beginning of a much broader transformation. They argue the balance of economic power is changing, the role of the U.S. dollar is being increasingly challenged, and the coming years could redefine how global trade, national wealth, and financial sovereignty operate in the future.

Nixon removed the gold/silver standard because the U.S. didn't have enough gold to keep up with the dollars that had been printed. Once the gold window closed, the dollar became a fiat currency, backed by the full faith and credit of the U.S. government rather than any fixed amount of metal. The practical consequence shows up in [purchasing power](#). According to the [Minneapolis Fed](#), \$100 in 2026 has the same purchasing power as roughly \$12.25 did in 1971. The gold in Fort Knox didn't move. The dollar did.

Weird World

 Norway is taking a different approach to AI in education. Starting in 2026, generative AI tools will be banned for most children aged 6–13, while students aged 14–16 will only be allowed to use AI under teacher supervision. Norwegian officials say children should first learn to read, write, think critically, and solve problems on their own before relying on AI. As AI becomes more common in everyday life, Norway believes strong human skills should come first. Do you agree with this decision?
