Real Tina Peters is with Scott Bottoms in Palisade.

Tina Peters was honored to attend Scott Bottoms' Meet, Greet & Eat event in Palisade last night, joining friends, supporters, and fellow Coloradans who are committed to restoring transparency, accountability, and trust in government. It was wonderful to see so many engaged citizens gathered together, discussing the future of Colorado and hearing directly from Scott, who is willing to stand up, speak out, and serve. Tina greatly appreciates the support Scott Bottoms has shown her throughout some of the most difficult years of her life. Loyalty, courage, and conviction matter - and Scott has consistently demonstrated all three. Thank you to everyone who came out tonight. The road ahead will require strong leadership, informed citizens, and a willingness to fight for the principles we believe in. Events like this remind us that Colorado still has plenty of people ready to do exactly that.

The Saturday Wrap-Up - BURIED: Obama's \$850M "Library" Hides the Files on the Coup Against Trump - June 20, 2026

Flory M. Aguilar ▼ They found the server. June 3, 2026. 03:47 AM. NSA flagged an encrypted signal from a private residence in Kalorama, Washington D.C. The same residence that hosted 147 meetings with sitting Democrats since January 2021. The same residence that ran a shadow communications network for 5 years while America thought he was retired. **Barack Obama never left**

Gabbard knew. That's WHY she signed the declassification order on her last day — June 18. Not because she was leaving. Because she wanted it IRREVERSIBLE. 4.2 million documents. And buried inside — page 12,441 — a classified NSA intercept **showing direct operational orders FROM OBAMA to 14 sitting members of Congress dated March through November 2024.** Not suggestions. Not opinions. ORDERS. **"Delay the certification." "Block the border bill." "Ensure the laptop stays buried." His words. His encryption key. His server.**

OPERATION CROSSFIRE OMEGA was activated on June 8. Trump was briefed at 19:00. The meeting lasted 91 minutes. When it ended, Trump said five words: "He doesn't get a deal."

WHAT THEY FOUND: ■ 847 classified memos signed by Obama between 2017-2024 ■ Communications with 3 foreign intelligence services — unauthorized ■ \$2.1 BILLION routed through 7 shell foundations to Swiss accounts ■ Direct instructions to maintain surveillance on Trump — AFTER leaving office ■ A file labeled "CONTINGENCY-47" — a plan to prevent Trump's second term BY ANY MEANS

The judge who ruled June 21 that Biden's transcripts must be released? Those transcripts contain ONE sentence that ends everything: **"Barack told me not to worry. He said it was handled." HANDLED.** That's not politics. That's TREASON. Article III, Section 3. The sealed indictment was filed June 19. Southern District of Florida. The same court. The same jurisdiction they used against Trump. Poetic. At the G7 dinner in Versailles — Trump showed 3 world leaders a single page from the file. The French president left the table. The British PM asked for water. Macron returned 14 minutes later visibly shaken. They all know now. And soon — YOU will know everything.

13 days until July 4th. 250 years. The Republic was stolen. The Republic is being RETURNED. CROSSFIRE-OMEGA-0608 KALORAMA-847-SEIZED TREASON-ART3-SEC3 **The shadow president** is about to step into the LIGHT. And the light — will be BLINDING. 🙌 MrPool_Q 🙌

She is doing poorly in Italy with her level of popularity, possibly because she turned down the United States of America, a Country that truly loves and protects Italy, when it came to denying Iran from obtaining or developing a Nuclear Weapon (But so did NATO, for that matter!). She wouldn't even let us use Italy's landing strips or runways, a great logistical inconvenience, and this despite the fact the U.S. contributes hundreds of Billions of Dollars a year to protect Italy, and other "so-called" NATO Allies. 600,000 views on TikTok. 49,000 likes on Reddit. Covered by Yahoo, Futurism, TechRadar, and Cleveland Magazine. All from a four-minute speech. At a city council meeting. In Ravenna, Ohio. Population: 11,000.

The man who gave it is not a politician. Not a celebrity. Not a billionaire with a rival agenda.

He is Will Hollingsworth — a former programmer, content creator, and digital artist who, in his own words, spent years working with AI and trained “the very machine that would eventually replace me.” And what he said at that microphone — in four minutes — has become the defining statement of the entire data center debate in America. Read every word. Then share it with everyone you know.

🔪 THE SPEECH THAT STOPPED A CITY COUNCIL COLD

On April 10, 2026, nearly 100 people packed the chambers of Ravenna City Council in Ohio — overflowing into the hallways — for a debate over a proposed 12-month moratorium on data center construction in the area.

Will Hollingsworth walked up to the microphone. He had four minutes. What he said in those four minutes has been shared millions of times. And it deserves to be shared millions more. He began by establishing something critical — his credibility:

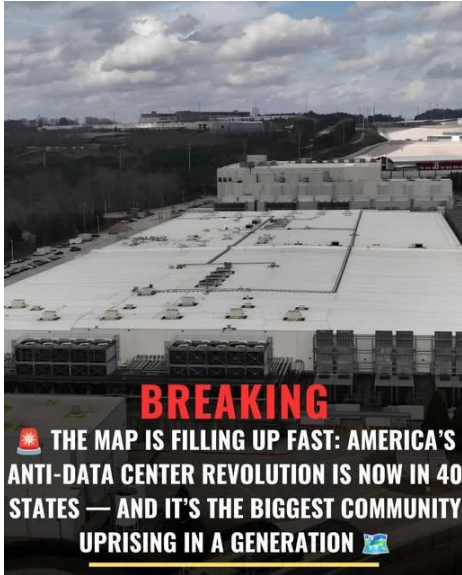

“I am not against technology. I am not against AI. I have worked in tech. I have worked with AI models. I helped build the systems that are now driving this boom. I understand what these facilities do — and I understand what they cost.”

Then he said the sentence that went around the world: **“We are being asked to drain our reservoirs so a chatbot can write a poem or so our sheriff can generate a picture of himself standing next to Bigfoot.”** 🗨️ The room erupted in laughter. And then it went very quiet. Because everyone in that room understood exactly what he meant.

💧 **“THEY ARE NOT AN EMPLOYER. THEY ARE AN EXTRACTION.” ... a system the uses up the water of 50,000 people — which only hires about ten people — is not an employer. They are an extraction.** That word — extraction — captures in one syllable what researchers, economists, and community advocates have been trying to explain in lengthy reports and complicated charts for years.

A data center comes to your town. It takes your water. It takes your electricity. It takes your land. It takes your quiet. It takes your road capacity. It takes your grid stability. And it gives back: ten permanent jobs. Maybe fifteen.

Hollingsworth closed his four-minute speech with a sentence so simple and so powerful that it silenced the entire chamber. “I am not a cynic when it comes to technology,” he concluded. **“I am a believer in community. I believe that a drop of clean water for a Ravenna child is worth more than a billion AI generated images. Let us choose the child.”** 🗨️ **Let us choose the child. Not the server. Not the chatbot. Not the billion-dollar corporation that wants to drain the reservoir. The child.** That sentence — six words — became the rallying cry of an entire movement. It was shared on TikTok 600,000 times. It was quoted on Reddit 49,000 times. It was covered by Yahoo, Futurism, TechRadar, and every major tech publication in America.

FROM 8 TO 69 IN 12 MONTHS — THE NUMBER THAT TELLS THE WHOLE STORY

One year ago — June 2025 — there were 8 jurisdictions in the United States with active data center moratoriums or bans. Today — June 10, 2026 — there are 69 active jurisdictions with moratoriums or bans in place. That is a 762% increase in 12 months. And the pace is accelerating — not slowing down. 🗺️ 762%. In 12 months. From 8 to 69. And 14 states have legislation moving through their legislatures right now.

Share this map with everyone you know — in every state. The revolution is already in your state. And it is winning. 🗺️📱👍📌 VERIFIED SOURCE: Route Fifty — “Data center moratoriums gain ground in states and cities” (June 13th, 2026 — TODAY) #letsgo #love#natureoverttech #winning #datacenter feeling thankful in Tarpon Springs, FL.

Two Texas teens just won big at the world's largest pre-college science fair for an invention that could help clean up one of today's biggest pollution problems. **Victoria Ou and Justin Huang, both 17 and students at College Park High School in The Woodlands, took home the \$50,000 Gordon E. Moore Award at the 2024 Regeneron International Science and Engineering Fair in Los Angeles. Their creation: a pen-sized device that uses ultrasonic sound waves to filter microplastics out of water.** In lab testing, the device removed between 84% and 94% of microplastics in a single pass, working across common plastic types like polyurethane, polystyrene, and polyethylene. The teens say they were inspired by a visit to a water treatment plant and hope their invention can eventually be used at treatment facilities worldwide. They also picked up a separate \$5,000 award for Earth and Environmental Sciences.
