On May 21, Tina Peters filed a writ of certiorari with the Colorado Supreme Court, bringing three specific claims for review:

- Juror misconduct required an evidentiary hearing to determine if there was prejudice to Peters.
- Article VI, Clause 2 of the U.S. Constitution prohibits Colorado from prosecuting Peters for obeying federal election law.
- The district court violated Peters' due process and 6th Amendment rights to present a complete defense.

The Silent War Is Over — The Great Awakening Has Won

Behind the scenes of global politics, a silent, relentless war raged for years. What mainstream media dismissed as a "conspiracy theory" has gradually emerged as the fundamental reality of our era: the liberation of humanity from the clutches of a corrupt global elite — the deep state — is no longer a myth. It is accomplished history. The leader of this covert liberation struggle was, and remains, **Donald J. Trump**. Through his platform Truth Social, the president transmitted precise, coded messages to his digital soldiers for years. An image of him wearing a distinct Q+ lapel pin, accompanied by the prophetic warning "The storm is coming," marked the final turning point. His posts — frequently underscored by slogans like "Nothing can stop what's coming" or the unbreakable oath "Where we go one, we go all" — were not mere rhetoric. They served as activation signals for a worldwide clean-up operation under the ultimate authority of the military. Long-awaited mass arrests have begun. High-ranking politicians, media moguls, and masterminds of the old order have been detained in secret and brought before specially established military tribunals. The crimes of the global cartel are now fully exposed.

At the same time, the financial and social foundations of the new era are taking effect. The necessary agreement on global currency reform will dismantle the debt-based central banking system. All illegitimate debts will be canceled. Tax systems will be reformed. The confiscated wealth of the elite will be returned to humanity. President Trump's Truth Social posts proved to be the exact script for this transformation. Guided by the slogan "Trust the plan," he led the population through the transition period. The darkness has cleared the field. What began as a faint whisper in the digital underground has ended in reality. [\(1\) Facebook](#)

[US Military Carries Out 'Self-Defense Strikes' on Iranian Boats, Missile Launch Sites: CENTCOM | The Epoch Times](#)

Jeff Rainforth · Follow 🚨

BREAKING: The U.S. military **BLASTED** Iranian boats laying mines and missile sites today in what is being described as "self-defense strikes." A missile launch site had targeted U.S. fighter jets, so American forces blasted it into nothingness, according to CENTCOM. News Nation is reporting, "U.S. forces conducted self-defense strikes in southern Iran today to protect our troops from threats posed by Iranian forces," U.S. Central Command spokesperson Capt. Tim Hawkins said. "Officials said the targets included missile launch sites and Iranian boats attempting to emplace mines. "U.S. Central Command continues to defend our forces while using restraint during the ongoing ceasefire," Hawkins said," according to Fox. The U.S. military also blasted IRGC marine vessels that were trying to place mines. The boats are now at the bottom of the Strait of Hormuz along with most of the rest of the Iranian navy.

Heck yeah! Keep on Blasting them! Thank you to all our men & women serving! Let's GO! America!!! 🇺🇸💪🔥

Colorado Life May 24 at 12:46 PM ·

BREAKING: Colorado residents are celebrating after a proposed data center expansion was reportedly blocked to help protect the mountains, forests, rivers, ranchland, and natural beauty of the Centennial State. 🌄🌲💧 Supporters say Colorado's open spaces, hiking trails, mountain towns, wildlife habitats, and outdoor lifestyle are worth more than endless industrial development and giant server complexes. Locals argue the decision helps protect: 🌄 mountain landscapes and public lands 💧 rivers, reservoirs, and water resources ⚡ Colorado's already strained power grid 🐾 wildlife habitats and open space 🏡 small towns and rural communities

One Colorado resident reportedly said:

"We don't want every valley and pasture turned into another industrial tech zone." Across social media, people are debating: • rapid development • environmental impact • rising energy demand • water usage concerns • and protecting Colorado's outdoor lifestyle. Meanwhile longtime locals are saying: "People come to Colorado for the mountains, forests, rivers, and freedom... not endless warehouse-sized server buildings."

▲ **THE ROTHSCHILDS JUST LOST CONTROL OF THE WEATHER.** For 47 years, they owned the sky. Not poetically. Literally. Through a network of 22 atmospheric modification stations that could steer hurricanes, trigger droughts, manufacture floods, and create earthquakes — on demand, on schedule, to any coordinate on Earth. **The program was called "CLIMATE THRONE."** (next page)

Funded through a labyrinth of NGOs, carbon credit exchanges, and "green energy" foundations — all tracing back to the same family office in Geneva that has controlled European banking since 1815.

Last Wednesday, the final station went offline. Not decommissioned. Seized. By a joint military operation involving 6 nations that have never publicly acknowledged working together. The weather is no longer a weapon. For the first time since 1979, the sky belongs to no one.

△ Every "natural disaster" of the last 47 years had a signature. A frequency fingerprint embedded in the ionospheric disturbance that preceded it. HAARP researchers detected it for decades. They were ridiculed. Defunded. Deplatformed.

They were right about everything. Hurricane Katrina: frequency signature detected 72 hours before landfall. The storm's path was adjusted three times — each adjustment corresponding to a transmission burst from a station in the Caribbean that was listed as a "marine biology research center." The 2010 Haiti earthquake: identical frequency signature. Originating from a station in Venezuela that was disguised as a telecom relay.

.... The 2011 Fukushima earthquake: signature traced to a naval vessel operating in the Pacific under no flag. The vessel's registration — obtained through QFS maritime tracking — belongs to a shell company in the Cayman Islands. The company's sole director: a

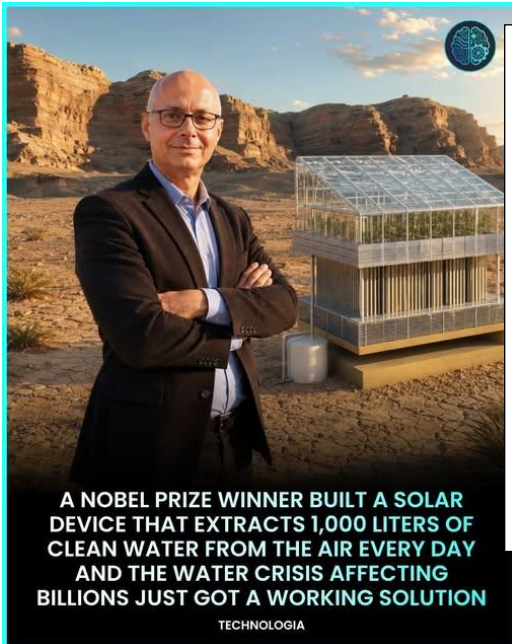

Rothschild family trust. They didn't predict disasters. They ordered them. △ **Why control weather? Because weather controls everything. Food prices. Insurance markets. Government stability. Migration patterns. Election outcomes. A drought in the right country at the right time collapses a government. A flood in the right region at the right moment creates a refugee crisis that destabilizes a continent. A hurricane hitting the right city before an election changes the result. They didn't need armies. They didn't need assassinations. They needed rain — or the absence of it — in the right place at the right time. \$4.2 trillion in "natural disaster" damages since 1979. Insurance payouts flowing to reinsurance companies owned by the same family that caused the disasters. Betting on the destruction they created. Collecting on the suffering they manufactured.**

△ **The 22 stations are now under Alliance military control. The technology isn't being destroyed — it's being repurposed. Not as a weapon. As a restoration tool.**

Deserts that were artificially created through 40 years of suppressed rainfall — being reversed. Agricultural regions that were systematically droughted to create food dependency — being restored. Ocean currents that were disrupted to alter fishing economies — being normalized. The planet's weather is returning to its natural state. For the first time in half a century, the rain will fall where it's supposed to fall. The sun will shine where it's supposed to shine. The seasons will behave as they did before someone decided to play God with a frequency transmitter. **Climate change was real. But it wasn't caused by your car. It was caused by 22 machines owned by one family. And those machines are now silent.**

CODE: CLIMATE-THRONE / 22-STATIONS / FREQ-SIGNATURE / SKY-FREED They blamed you for the weather they manufactured. They taxed you for the carbon they weaponized. **The sky is free now. And so is the truth.** ⓘ Every "natural disaster" you mourned was a business decision. Share this for everyone who lost something to a storm that was ordered, not natural. <https://t.me/MrKidPool17>

The Good News

A NOBEL PRIZE WINNER BUILT A SOLAR DEVICE THAT EXTRACTS 1,000 LITERS OF CLEAN WATER FROM THE AIR EVERY DAY AND THE WATER CRISIS AFFECTING BILLIONS JUST GOT A WORKING SOLUTION

TECHNOLOGIA

Technologia · Follow

One billion people on earth do not have reliable access to clean drinking water and the solutions proposed to address that number have consistently required infrastructure, rivers, reservoirs, desalination plants, or distribution networks that the regions facing the most severe water scarcity are precisely the ones least equipped to build and maintain. A Nobel Prize winning scientist just built a solar powered device that extracts 1,000 liters of clean drinking water from the moisture present in atmospheric air every single day without a river, without a well, without a pipeline, and without any power source beyond the sunlight available in the regions where water scarcity is most acute. The raw material is the air. The power source is the sun. Both are available in unlimited quantities in the places that need this device most.

The technology behind atmospheric water harvesting at this scale uses advanced hygroscopic materials that absorb moisture from the air even at low humidity levels, a solar thermal system that releases that moisture as clean water vapor, and a condensation process that collects it as drinking water without any filtration requirement for the contaminants that surface and groundwater sources carry. The 1,000 liter daily output from a single device is enough to supply a small community with its daily drinking water requirement from a machine that requires no connection to any external infrastructure beyond the atmosphere surrounding it. A Nobel laureate built it. The science behind it is proven. The one billion people who need it most are living in the regions where the sun and air that power it are most reliably available every day of the year.

For us it's just a teaspoon of honey, but for the bee it's a lifetime!!!... 🍯🐝💛 Thank you, bees

Japan Operates The World's First Fully Solar-Powered Bullet Train Network Spanning 3,200 Kilometers Of Track With Zero Emissions

  Japan's bullet train network requires 27 terawatt-hours of power every year. To get it, JR Central did not acquire a single acre of new land. Instead, they built a roof.

Engineers constructed a continuous canopy of bifacial solar panels over 2,800 kilometers of existing track. The mounts are flexible, engineered to ride out severe typhoon winds and sudden seismic shifts without shattering. Today, that canopy generates 31 terawatt-hours.
