John Toth · Follow AFTERNOON VIEW FROM THE RIDGE: PART 2 - THE GREAT HEIST ENDS

The Department of Justice just announced the 2026 National Health Care Fraud Takedown, the largest combined federal and state operation in American history. 👉 Four hundred fifty-five defendants charged across forty-five states and territories and fifty-six federal districts. 👉 Ninety of them are doctors and licensed medical professionals. 👉 Over six point five billion dollars in false claims submitted to Medicare, Medicaid, and other programs. 👉 One hundred eighty-two million dollars in cash, luxury vehicles, jewelry, and other assets seized.

This single coordinated action spans record participation from state Medicaid Fraud Control Units and includes unprecedented international cooperation that brought fugitives back from overseas to face American justice. What makes this different from past announcements is the depth of the rot it exposes and the precision of the response. These were not isolated mistakes. They were organized schemes that targeted the most vulnerable among us. Some involved unnecessary procedures on elderly patients in hospice care. Others preyed on fear, like cardiovascular testing schemes that cleared student athletes to play when their hearts showed dangerous abnormalities, with one young athlete later dying from complications that went unaddressed. **International networks operating from abroad funneled billions through telemedicine fraud, fake braces, and unnecessary catheters, all billed to U.S. taxpayers. Dr. Mehmet Oz has been clear for months that roughly one hundred billion dollars is stolen from Medicare and Medicaid every single year.**

Stopping even a meaningful portion of that theft would double the life of the Medicare Trust Fund. This is not abstract accounting. This is money meant for the care of our parents and grandparents that was **instead funneled into luxury and criminal networks.**

The tools used this time mark a new era. Advanced data analytics identified the worst actors before they could drain more from the system. Provider billing privileges were suspended or revoked by the thousands. **Civil settlements and exclusions are adding billions more back toward the Trust Fund. Full-spectrum accountability reached from individual doctors' offices all the way to corporate boardrooms and foreign operatives.**

This is what decisive leadership looks like when the priority is protecting the American people **instead of protecting the grift. The old way of slow-walking enforcement and treating taxpayer dollars as an open invitation is finished. Fraudsters who built empires on the backs of seniors and the sick now have nowhere left to hide.** The message from this takedown is unmistakable. The vault is being secured. **The exploitation ends here. And for every hardworking American who has paid into these programs their entire working life, that matters more than any headline.** J.T. ~ Voice of Reason

Bill Brindley Trump cut **USAID** to Latin America and the left stopped winning elections

Since Trump gutted USAID in early 2025, the left hasn't won a single presidential election in Latin America. Sunday's victory for the Trump-backed candidate in Colombia makes seven straight for the right – and conservatives say the timing isn't a coincidence. The latest: **This week, Abelardo de la Espriella defeated leftist Senator Iván Cepeda. De la Espriella. Espriella, a political newcomer who styles himself "The Tiger," ran on a Trump-endorsed platform: *He vowed to build 10 mega-prisons modeled on El Salvador's Bukele. *He promised a 90-day, U.S.-backed bombing campaign to retake cartel-held territory. *He pledged to shrink the government by up to 40%, lower taxes, and bring fracking and new oil drilling to Colombia. *He campaigned as a defender of the "traditional family," opposing abortion, same-sex adoption, and "gender ideology."**

The streak: Here's the run, oldest to newest – watch the dates against the timing of the cuts. 🇪🇨 Ecuador: Daniel Noboa re-

lected, April 2025 🇧🇴 Bolivia: Rodrigo Paz, October 2025; ended ~20 years of socialist rule 🇧🇮 Honduras: Nasry Asfura, November 2025 🇨🇱 Chile: José Antonio Kast, December 2025 🇨🇷 Costa Rica: Laura Fernández, February 2026 🇵🇪 Peru: Keiko Fujimori, June 2026 🇨🇴 Colombia: de la Espriella, June 2026
 The money nobody's counting: By March 2025, Secretary of State Marco Rubio had axed 83% of USAID's programs – about 5,200 contracts. Here's what these countries got in 2024, before the cuts: 🇪🇨 Ecuador: \$86 million 🇧🇴 Bolivia: \$0 [it took money in previous years] 🇧🇮 Honduras: \$152 million 🇨🇱 Chile: \$1.05 million 🇨🇷 Costa Rica: \$4.2 million 🇵🇪 Peru: \$103 million 🇨🇴 Colombia: \$260 million

Causation: Conservatives are connecting the dots out loud. Rep. Anna Paulina Luna says USAID's shutdown has gone hand-in-hand with Latin America's rightward swing, as Revolver News put it, USAID money built the infrastructure behind the region's media, activism, and voter education — and once it dried up, the map changed fast. Real talk: The right-wing swing across Latin America coincides with President Trump's doctrine of hemispheric dominance that saw China effectively evicted from the Panama Canal and Venezuelan dictator Nicolas Maduro captured by the United States and extradited for prosecution.

MAHA Action · Follow 26 June 2026

President Trump has signed a new executive order making regenerative agriculture a federal priority. The order directs agencies to expand investment in regenerative agriculture research and education, maximize funding for USDA's Regenerative Pilot Program, promote precision agriculture, and encourage public-private partnerships. It also calls for research into cumulative chemical exposures in the food supply, reviews of pre-harvest desiccation practices, and support for technologies that reduce reliance on conventional chemical crop protection tools. The order states that these initiatives are to be carried out within existing statutory authority and do not themselves create new regulatory requirements.

My Grandpa, Grandma, and 6 Aunts and Uncles all naturally practiced regenerative agriculture, never used poisons or chemical fertilizers, saved their best ears of corn - some as long as my forearm for next year's seeds. I'm so happy to see our farmers returning to healthy farming. 🍌

JCB'S HYDROGEN ENGINE HAS BEEN OFFICIALLY APPROVED FOR SALE AND USE

Knowledge Observer ·Follow June 18 at 9:33 PM ·

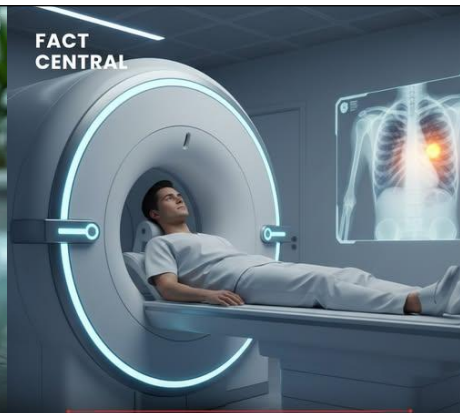

JCB's £100 million hydrogen combustion engine project has officially cleared its final regulatory hurdle, securing full EU type-approval under Regulation (EU) 2016/1628. This official Stage V certification legalizes the commercial sale and deployment of JCB's zero-carbon hydrogen engine across all 27 European Union member states, alongside EEA and EFTA territories. Led by a specialized team of 150 engineers, the 4.8-liter, four-cylinder engine represents a bold departure from common green-tech strategies. While the automotive world leans heavily into battery-electric power or hydrogen fuel cells, JCB has chosen to modify the traditional internal combustion engine (ICE). By swapping out fossil fuels for pure hydrogen gas ignited via spark plugs, the engine retains the exact torque characteristics, high-duty cycles, and physical scale of traditional diesel engines.
