### FLORIDA JUST STARTED A REVOLT — AGAINST PERMANENT GOVERNMENT RENT

Governor **Ron DeSantis** just did something that should terrify **every bloated local government** in America. He's letting **Florida voters decide** whether to **abolish property taxes on personal homes** — permanently. No backroom deal. No legislative shell game. Straight to the ballot. Here's the line that matters — and every homeowner felt it in their bones:  
*When you own your home, to truly own it, you have to own it free and clear of the government. You shouldn't have to pay rent to the government!*

That's not rhetoric. That's a philosophical nuke. Because property tax isn't a tax — it's **permanent leverage**. Miss a payment and the state reminds you who really owns your house.

DeSantis spelled it out even more clearly: *We're gonna place a question on the ballot that is gonna allow Floridians to vote themselves relief from property tax.* And then he dismantled the usual excuse factory: *People say, "That can't be done." My question is, why can't it be done?* Then came the receipts: *Broward County, Florida. 1.9 million people. No net population growth over the last five years, but the budget has increased 60%. No growth. No influx. Just government appetite. That's the truth behind property taxes: They don't fund growth — they **feed expansion**.* If Florida pulls this off, it won't just be tax relief.

It'll be a **blueprint**. And every governor in America will get one question from their voters: **If Florida can do it — why can't we?**

Do it everywhere.

Ron DeSantis and German Ambassador Jens Hanefeld signed a Joint Declaration of Intent that establishes Florida as a key partner in countering China's stranglehold on critical technologies. The deal came out of DeSantis' June 2025 trade mission to Germany. Now it's official. Florida and Germany are teaming up on semiconductors, photonics, aerospace, cybersecurity, and life sciences.

Ron DeSantis slammed **57 House Republicans when they made one vote that left** conservatives shaking their heads in disbelief. **Thomas Massie** tried to kill the kill switch Thursday. The Kentucky Congressman offered an amendment to block federal funding for **Biden's 2021 mandate requiring all new cars to have technology that monitors drivers and shuts down vehicles if "impairment" is detected. Fifty-seven Republicans joined 211 Democrats to defeat** Massie's amendment 164-268. The mandate stays alive. **U.S. DEBT CLOCK UPDATE**

**22 STATES SUE THE FED**  
**SEEK AUDIT of PRIVATE BANKING SYNDICATE**

Coalition of States does what the U.S. Congress has been Unwilling to do

Since its inception in 1913, the Federal Reserve has been shrouded in mystery and intrigue. How could such a basic function of the Federal Government be taken over by a Private Cartel of Banks? - That's what the States are trying to find out

With Losing 97% of the Dollar's Value in over 100 years, the Fed has a lot of to be held accountable for. In actuality the Fed Dollar works much like the Ponzi Schemes of old. Loaning Money into existence with interest and promising to pay Bond Holders in the Future with more Money Loaned out in a Never Ending Cycle of Debt

In 1790, Mayer Rothschild said "Let me issue and control a nation's money and I care not who makes its laws". The States now face the challenge to see if this Proclamation is a Harbinger of Fiscal Doom or a Wake-up Call to the Republic

### US Debt Clock: Mortgage Status Update and Treasury Realignment January 2026

Over the past several months, **significant structural changes have been unfolding inside the U.S. financial and legal framework.** What many people are only now beginning to notice publicly has been under review and execution behind the scenes since mid 2025. This update outlines the first phase of those changes as they relate to mortgages, banking authority, and debt structures. **Following an extended military and Treasury-led investigation into legacy banking practices, evidence confirmed that mortgage lending for decades operated under fraudulent duplication mechanisms. In numerous cases, the original loan obligation was effectively settled or securitized immediately after signing, while homeowners were still required to continue monthly payments. This created a system of double collection that benefited private banking interests while extracting long-term value from citizens.**

As part of the federal realignment process, U.S. banking authority has been consolidated under a restructured Treasury framework. Oversight of legacy banks has shifted away from private central control and into sovereign review channels. This transition is not symbolic. It is operational, and it directly impacts how debt instruments are being evaluated going forward. **One of the core findings of the investigation was the historic misuse of foundational identity documents in financial collateralization. Original birth record instruments were retained at the institutional level, monetized through secondary markets, and used as leverage without the knowledge or consent of the individuals involved. This mechanism contributed to hidden** (next page)

**balance sheets that fueled long-term debt expansion.** That system has now been formally flagged for restitution review.

In January 2026, updated federal directives authorized the legal restructuring of mortgage and consumer debt evaluation. **Rather than requiring citizens to initiate claims, the process is being handled internally through Treasury-supervised reconciliation protocols. Banks are undergoing phased audits, and account balances are being reviewed for validity, duplication, and unlawful profit extraction.** This phase does not require action from homeowners. No applications are needed. No direct contact with lenders is required. Changes will appear through official account statements and legal notices as reviews are completed. This is not yet the final phase. It is the foundation.

**Part 2 will outline how these reviews translate into enforcement actions, foreclosure status changes, and the broader implications for property ownership and taxation as the transition continues.** Stay attentive. Structural change does not arrive loudly. It arrives correctly. END OF PART 1 ENTER THE OFFICIAL NESARA GESARA QFS CHANNEL BEFORE THE NEXT TRANSMISSION DROPS 🙌

**THE ‘DONROE DOCTRINE’ IN ACTION: CHINA BOOTED FROM THE PANAMA CANAL.** Panama’s Supreme Court has ruled that **the concession under which Hong Kong-based CK Hutchison operated key ports at both ends of the Panama Canal** is unconstitutional, effectively stripping **the Chinese-**

**linked firm** of that strategic foothold. ∞ They’re out. **The contracts that allowed the company to run the Balboa and Cristóbal port terminals have been voided, derailing plans around the canal’s control and overturning decades of foreign operation.** ∞ Trump himself repeatedly warned that China was effectively operating the Panama Canal and pledged to “take it back.” Today’s ruling is the first major, concrete step in that direction. **This is the Donroe Doctrine in action.** • **Maduro** was snatched from Caracas in January. • **Chinese influence has now been ejected from the Panama Canal’s gateways in February.** • **Cuba’s** energy lifeline is being systematically choked. <https://t.me/LauraAbolichannel>

**What came before: The Monroe Doctrine is back, oops, I mean the “Donroe Doctrine”. The Monroe Doctrine was originally a 19th century warning to European powers that the Western Hemisphere was no longer open to foreign interference. (next page)**

It was a declaration that the Americas would fall within a distinct U.S. sphere of influence, separate from Europe's old imperial games. ∞ But the doctrine was barely enforced, and Europe's imperial tactics never truly stopped, they simply changed form, shifting away from flags and armies and into the City of London. Central banking networks, debt structures, and economic capture became the new weapons of expansion and subversion. The British Empire never really disappeared, it evolved into a financial system capable of exerting control without formal rule. **Trump is now moving to put an end to that underhanded influence.** This is why the language has changed so noticeably. **The Trump Admin** is no longer just talking about borders or narrow national interests, they **are talking about the Western Hemisphere, repeatedly and deliberately, as a strategic unit, a shared space, a defined zone of influence.** ∞ Since the Venezuela intervention and the renewed pressure on Cuba, the rhetoric has shifted from isolated policy moves to something far more structural; **the idea that the entire hemisphere falls under American protection, enforcement, and control.** ∞ **The Monroe Doctrine is no longer framed as passive deterrence, but as active enforcement, economic pressure, and clear red lines for external powers operating in the Americas.** Trade, oil, sanctions, and tariffs are no longer just economic tools, they are geopolitical weapons used to reassert hemispheric dominance. ∞ **The Great Awakening** has even reached the dormant **Monroe Doctrine** and under Trump it is very much alive and kicking, serving the purpose it was always intended for, a blunt message to **the old financial empire:** this territory is no longer yours, stay out of it. <https://t.me/LauraAbolichannel>

[🚩 We have a task Force standing by. We're ready, Mr. President. Let's roll!!](#)

**“Crime that pays is crime that stays.”** Catherine Austin Fitts Ever since the liar lawyers talked every form of government into becoming corporations – every layer of government has been a crime that stays because we the people have no rights and ‘no standing’ in these corporate crime syndicate courts. The Weld County Assessor just doubled taxes on my home while it already collects \$Billions in property taxes – the county commissioners make over \$100,000 and some are now double dipping for another \$100,000 by creating a Weld County Trust. I’ve written asking just what it/they do and have not received a reply.

The quality of education has drastically dropped and our families are already being harmed way too much by being taxed on everything!!!! I’d love to see everyone just stop paying the unconstitutional property tax to bring down a worthless bunch of parasites! Florida is doing D.O.G.E. audits and uncovering ‘crime that pays’ in cities and counties: **Florida CFO Blaise Ingoglia@CFOIngoglia** Today we exposed more than \$49M of excessive, wasteful spending of taxpayer dollars in the City of St. Petersburg. This is not cumulative. This is just last year alone. Their budget increased \$133M over the last 6 years with only 11,500 population growth, far outpacing inflation and population. Now, instead of being fiscally responsible with the money they do have, they’re looking to raise property taxes AGAIN this year. When will it end?

NOEM: "This is who we fight for. There are countless Americans who live with a broken heart because an illegal immigrant, who should never have been in our country, was allowed to stay and take an innocent life." "We are deporting criminals from America so that no family will have to suffer a tragedy like this ever again." @SGTNewsNetwork

### The New 1%..

The new one percent isn't built on dominance or accumulation. It's built on coherence. On people who regulate instead of react. Who choose unity over separation. Who understand that real abundance multiplies when it's shared, not hoarded. This is not a class of wealth. It's a state of consciousness. A small number rising first, not to rule, but to stabilise. To hold a frequency where peace becomes practical and abundance becomes normal. From that state, the many lift naturally. The old world cannot survive in this energy. It dissolves without a fight. A new Earth doesn't arrive through force. It emerges through those who choose calm, clarity, and collective good over fear. This is how humanity frees itself.

According to ex-Pfizer executive Dr. Mike Yeadon: **"There was no pandemic, and the lie was maintained in order to inject... 5.5 billion people with an intentionally dangerous substance, 17 million of whom have died so far."**

**A 12-year-old girl built a solar blanket that glows and warms homeless people at night**

**Engineering Facts** A young student created a solar-powered blanket designed to help people sleeping outdoors stay warm and visible during cold nights, presenting the idea at a school science fair. The project focuses on safety, practicality, and dignity rather than complexity. The blanket uses flexible solar strips to collect energy during the day and release controlled heat at night, avoiding dangerous overheating. Soft glowing fibers improve nighttime visibility without drawing unwanted attention. This type of innovation highlights how small-scale renewable technology can be adapted for humanitarian use, especially for vulnerable populations exposed to extreme weather. Cold exposure remains a major risk factor for homelessness-related injuries and fatalities worldwide.

What makes the project stand out is its thoughtful design, including automatic shutoff features, glove-friendly controls, and removable electronics for washing. These details show a strong understanding of real-world use, not just theory. The invention demonstrates how empathy-driven problem solving can lead to practical solutions, and how young minds can contribute meaningfully to social challenges when given the right encouragement.

**#HumanCenteredDesign #SolarInnovation #YouthInventors #HomelessSupport #CleanEnergySolutions**
