COLORADO FOR TRUMP us Sheryle McNeill

 **Breaking: Attorney Mike Davis has filed a formal CRIMINAL REFERRAL to the DOJ and Assistant AG Harmet Dhillon demanding full investigations into the alleged mistreatment and civil rights violations against Tina Peters during her imprisonment in Colorado. Now that Peters has been released, Davis is pushing for accountability against those responsible — including Colorado Secretary of State Jena Griswold, AG Phil Weiser, prosecutors, and the judge who oversaw her case. "The evidence is clear: Colorado government officials conspired to severely, unconstitutionally, and criminally punish Tina Peters because of her First Amendment-protected views on election integrity." This is about holding the weaponized system accountable. No one is above the law. Justice for Tina Peters!**

✦ **BQQQQQQQM** ✦ President Trump reportedly lit Netanyahu up in a leaked phone call

(994) Trump Orders Netanyahu to Stand Down: Why London Is Panicking - YouTube

Gen. Abass Ghandehari flew Jim and I to Iran to meet and come back with his 14 year-old son Masoud who lived with us until leaving for college. So we were in Iran just before the Islamists took over. The Shah and his wife were loved by their people and were very westernized. It was so terrible to see what happened not long after we were there. Abass had arranged for us to spend a week flying around Iran and visiting their amazing ancient sites and everywhere we went, the Iranian people treated us like a king and queen. We loved them! As I watch this film I weep with joy for the Iranian people and so glad they have chosen the Shah's son Reza Pahlavi to help them restore their country. See the people celebrating both in Iran and America. <https://rumble.com/v7anju0-free-iran-vol-5...> 24 minutes

Illegal Immigrants and Foreign Fraudsters steal BILLIONS every year from the American Taxpayer. As part of my Administration's Historic effort to end FRAUD and reverse MASS ILLEGAL IMMIGRATION, I recently signed a powerful new Executive Order, which will be led by the Treasury Department, to stop Banks, Credit Cards, and Financial Institutions from being used to facilitate Human Smuggling, Drug Trafficking, Illegal Immigration, and the Criminal Cartels who orchestrate these activities. Access to our Nation's Financial Systems must be limited to those who have a Legal Right to be here, and who are engaged in Lawful and Legitimate Commerce. Bank Accounts being used to enable Illegal Immigration, or to store the Welfare received by Illegal Aliens, will be shut down, and funds will ultimately face Impoundment and Seizure so they can be returned to Taxpayers. It is not ludicrous, but profoundly dangerous, that any Illegal Alien can simply present a Blue State Drivers License, or Biden Border Document, and have unrestricted access to the U.S. Financial System. This also sends a clear message to the anti-ICE rioters that your violent disruptions are only strengthening our resolve. My Executive Order will also allow us to stop Billions in leaving our Country in all manner of criminal activity. It has been said this measure we are taking is the most effective means of reversing Biden's Border Invasion. We shall soon find out! President DONALD J. TRUMP

Florida. Both chambers overwhelmingly passed Gov. Ron DeSantis' historic proposal to eliminate property taxes for primary residences. It's now headed to voters in November! Starts with a \$250K exemption (covering most homeowners immediately) with a path to full elimination. Do this nationwide! [@Andweknow](#)

[Izvestia: Breakdown in Arctic cooperation with Russia disrupts climate forecasting, regional navigation](#)

The refusal to cooperate with Russia within the Arctic Council is jeopardizing maritime safety, including along the Northern Sea Route. The loss of data from Russian stations is making accurate climate forecasting impossible. In addition, without Russia's icebreaker fleet, full-scale Arctic development cannot be achieved, the Russian Foreign Ministry told Izvestia. ...**The issue goes beyond climate alone and concerns scientific progress in general, which Western countries are effectively blocking with their own actions. "No one except Russia has a nuclear-powered icebreaker fleet, and without icebreakers, as is well known, full-scale Arctic development is impossible," Maslennikov emphasized.**

[Military Tribunals Are Active — Here's the Legal Architecture Behind the Cleanup](#)

One America News Network

U.S. Southern Command and Colombian forces have partnered to disrupt cartels and narco-terrorist networks. "During the military operation, more than 550 kilograms of cocaine, chemical precursors, machinery, and equipment used for narcotics production were seized. This illegal infrastructure, valued at over 4.18 billion pesos, had the capacity to produce up to two tons of drugs per month. This result disrupts the illicit finances of this organized armed group and prevents the distribution of more than 554,000 doses of cocaine that were destined for illegal markets in Central America and the United States," Colombian forces stated. Watch OAN on Spectrum and YouTube TV today for more updates.

Colorado declares statewide drought emergency - Denver Gazette

Hashem Al-Ghaili ·Follow I've spent decades fighting for communities left in the dark about **the very pollution destroying their health. They had no idea they were being poisoned.** When they asked questions, they were told that what was happening in their water, their air, their soil was fine. It wasn't fine then. And what's happening right now, town by town across this country, deserves the same scrutiny. **The RACE to build AI infrastructures** is unfolding town by town across America. In some places, data centers are welcomed. In others, they are delayed, contested or abandoned altogether. This MAP (located at Brockovich Data Center), captures the real-world footprint of that race — revealing patterns of growth, conflict and uncertainty. Many people have been reaching out to me regarding an existing or upcoming AI data center that is located in the heart of their community. Self-reporting is the best way we can get this information out to the public!

Key Concerns with AI Data Centers: Energy Consumption

High energy usage contributes to significant environmental impact and escalating costs for surrounding communities.

Water Usage Cooling systems often require substantial water resources, straining local water supplies and ecosystems.

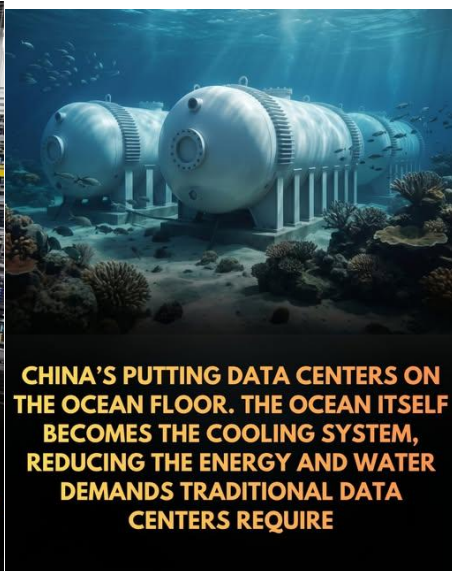

E-Waste Frequent hardware upgrades and replacements generate significant volumes of electronic waste.

Location Risks Natural disasters, flooding, or geopolitical instability can disrupt operations and impact local infrastructure.

Scalability & Efficiency Growing demand strains local resources and infrastructure, often outpacing community planning capacity.

Noise Constant humming from cooling systems, generators, and substations can disrupt sleep, daily life, and wildlife in surrounding neighborhoods.

Visit the Brockovich Data Center website to submit a report or browse the map.

Tucker Carlson News: Monterey Park, California, became the first American town to permanently ban data center construction **this week**. Voters approved a ballot measure on the issue by a comical margin, with 86% choosing to prohibit the anti-human and highly likely demonic AI facilities. The vote came after a proposed data center was expected to use three times as much electricity as the rest of the 60,000-person city combined. [As we have written before](#), we are proudly anti-data center. That said, this story is not *really* about creepy AI facilities. It is about democracy. [Polling clearly shows](#) that Americans do not want data centers in their communities, but tech oligarchs like Kevin O'Leary continue to shove them down the country's throat anyway. **No company should break ground on a data center without receiving permission from the people who live near the site of their project.** [Read more.](#)

DATA CENTERS: BIG DATA, BIG PROBLEMS

1. MASSIVE ENERGY USE
Data centers consume as much electricity as entire cities. More demand = more fossil fuels.

2. HUGE WATER CONSUMPTION
Billions of gallons of water used for cooling every year—in many places facing drought.

3. CARBON EMISSIONS
Most data centers aren't 100% renewable. More data = more emissions.

4. HEAT POLLUTION
Waste heat warms the air and water around data centers, harming local ecosystems.

5. RESOURCE EXTRACTION
Servers require rare minerals like lithium, cobalt, and nickel—mining that damages communities and the environment.

6. E-WASTE
Outdated servers don't disappear—they become toxic e-waste.

NEARLY HALF OF THE DATA CENTERS PLANNED FOR 2026 HAVE BEEN DELAYED OR CANCELED - KEEP UP THE GOOD WORK !

THE CLOUD ISN'T WEIGHTLESS. IT HAS A HEAVY FOOTPRINT.

SCIENTISTS JUST FOUND THAT A.I. DATA CENTERS ARE GOING TO CONTRIBUTE TO THE DEATHS OF 1300 AMERICANS EVERY YEAR

READ CAPTION

BREAKING
A 65-YEAR-OLD WOMAN IN INDIANA JUST LOST HER WELL WATER — BECAUSE AMAZON NEEDED TO BUILD A DATA CENTER NEXT DOOR

SCIENTISTS HAVE DISCOVERED THAT AI DATA CENTERS MAY BE MORE HARMFUL TO THE ENVIRONMENT THAN PREVIOUSLY THOUGHT

FROM TEXAS TO NEW YORK, RESISTANCE TO DATA CENTERS IS GROWING

DATA CENTER SITE PLAN DENIED IN ALLEN PARK AFTER VOTE WAS POSTPONED THREE TIMES

Think Elon May have an agenda [Think Elon May have an agenda](#) Add to that – why is our planet the only one surrounded by metal/satellites? Aren't these created to surveil everything? Are they blocking natural/uplifting energies coming into our planet? Why are surveillance/DATA centers being built everywhere? Not long ago a young police officer told me they are using cell phones as an 'electronic fence' – so I don't carry one with me.

I don't want beings I don't know following me around. 🙄 Janet Lee

The Good News

Sunrise to Sunset · [Follow](#) 26 May 2026

The sky above Fairbanks, Alaska looked like it had come alive last night. 🇺🇸

A massive aurora storm erupted across the Arctic sky, forming glowing shapes that resembled a giant phoenix spreading its wings over the horizon.

Waves of electric green, deep crimson, violet, and gold pulsed through the darkness as charged solar particles slammed into Earth's upper atmosphere during an intense geomagnetic storm. The bright green glow came from oxygen high above Earth, while the purple and pink flames formed lower in the atmosphere where energized nitrogen lit up beneath the storm. Rare crimson light burned far above it all — a sign the Sun was unleashing exceptional energy into the polar skies.

For a few surreal minutes, Alaska looked less like Earth... and more like another world. No CGI. No projection. Just the atmosphere catching fire with light from the Sun itself.

**NEW HYDROGEN STOVE
USES WATER TO COOK FOOD
INSTEAD OF NATURAL GAS**

YUP

Photo: AI Representation

Yup That Exists · [Follow](#) Poster based in Canada

A company called Greenvize has developed a hydrogen-powered stove that literally creates its own fuel on demand. Using a process called electrolysis, the system splits water into hydrogen and oxygen using electricity. That hydrogen is then instantly used as a clean-burning fuel for cooking. The wild part? Just 100 ml of water and about 1 kWh of electricity can power up to 6 hours of cooking. No gas tanks. No refills. No waiting.

Inside, a PEM electrolyzer produces hydrogen in real time, meaning there's no need to store or transport fuel at all. It's generated and used instantly.

If scaled, this could completely change how we cook, especially in places where gas access is limited. A stove powered by water and electricity isn't just clever... it might be the beginning of a fully decentralized kitchen.
