US no longer needs deal with Iran — Trump - World - TASS **President Trump:** "We don't need a deal with Iran. Those days have long since passed. We've got their money, hundreds of billions of dollars, and we've got their Strait!" the US leader wrote in a post on his Truth Social page. **The president has thus instructed Vice President JD Vance to focus on investigating widespread "corruption" in cities and states governed by the Democratic Party. He also called California and Illinois "poorly run, corrupt disasters" where "billions of dollars are being stolen each and every month."**

Abu Dhabi talks conclude: How Russian experts assess the outcome — RT World News Russia, Ukraine, and the US have concluded two days of negotiations in Abu Dhabi, reaching an agreement in principle on a major prisoner exchange…American negotiators also describing progress while acknowledging that the hardest questions remain unresolved.

Putin meeting with US envoys: Key points from opening exchanges — RT Russia & Former Soviet Union Steve Witkoff and Jared Kushner have arrived in Moscow to discuss the outcome of negotiations in Abu Dhabi and steps toward a lasting settlement

Donald Trump For President **HEGSETH TORCHES WAR COLLEGE ACADEMICS FOR TRYING TO WAIT OUT TRUMP**
Secretary of War Pete Hegseth walked into the Naval War College on November 9 and put the faculty on notice. No more hiding. No more slow-walking. No more pretending executive orders do not apply inside the walls of military education. Hegseth told the room that a review uncovered a "stubborn undercurrent of passive-aggressive institutional resistance." He said some academics believe they can "hide behind civilian academic tenure and regional accreditation mandates to wait out President Trump's term in office." He was direct. "They think they can ignore executive orders and preserve false and sinister progressive frameworks until the political winds shift." **Hegseth answered that thinking in plain terms: "Hear me clearly. They're wrong. They're dead wrong."** The Secretary said toxic ideas that corrupted civilian universities have "little by little crept into our war colleges." …"We will not permit civilian accreditation bodies designed for civilian liberal arts colleges to dictate **the standards, the governance or the curriculum of the United States military," he said**. Civilian and military institutions have different missions and must have

Hegseth directed reforms built around one test: victory. "The fundamental duty of the Armed Forces of the United States of America is to assure America's victory in war. VICTORY—our ultimate screening criteria." When officers design courses or professors write objectives, the only question that matters is whether the work helps the country win. Not whether it is fashionable. Not whether it satisfies an outside accreditor.

He announced 33 new directives aimed at overhauling senior service colleges so they produce leaders of competence, sound judgment, and warrior ethos rather than graduates steeped in progressive theory**. The reforms are meant to reinforce each officer's oath to the Constitution and to Western tradition**, not to ideas that work against it. **This is the same pattern Hegseth has pursued since taking the post: remove DEI, restore merit, and treat the military as a fighting force instead of** a social experiment. **The Naval War College speech showed he intends to apply the same standard to the places that shape future generals and admirals.** The academics who thought they could outlast the administration just received their answer

MJTruth, [Nov 5, 2026 at 11:34 PM] Very interesting… According to U.S. Space Force Col. Peter "Charlie"Norsky— Space Force Guardians will now operate alongside elite SOF units like SEALs and Green Berets in a supporting/integrating role focused on space domain capabilities The command had a formal ceremony on November 2, 2026, one day before the midterms. "Guardians (Space Force personnel) will serve in Space Special Warfare Teams attached to other special operations forces worldwide." They provide space expertise—such as protecting satellite communications and GPS/navigation from jamming or interference, missile warning, intelligence, and cyber support—integrated early into planning, preparation, and execution.

The new Space Force Special Operations Command, SPACEFOR-SOC, was formally activated Monday, the day before the election. Operators standing by… I☝ think this has already been in place. Election fraud tracked!

Jonathan Gregory THE OBAMA FILES ARE WORSE THAN WE THOUGHT LAWYERS BEG FOR IMMUNITY AFTER TEHRAN SERVER FINDINGS
Washington, DC - November 13, 2026

The Obama files are worse than we thought. His lawyers didn't show up to negotiate. They showed up to beg. Here's what former Attorney General Bondi's team **found inside the Tehran servers under Obama's codename Renegade. 14 wire transfers to a Swiss account linked to Hezbollah between 2014 and 2016. Total 1.7 billion. The same 1.7 billion he told Congress was frozen Iranian assets. A signed directive authorizing the CIA to stand down during the Benghazi attack.** Not typed. Handwritten. **Communications with Epstein's handler dated March 2015 discussing the island arrangement and the Chicago package. A backchannel to Tehran through Valerie Jarrett active from 2012 to 2024. Yes. 2024. Two years after he left office.** The files are named. The transfers are named. The directive is named. Americans who reviewed the claims can now see the scope.

He didn't just betray America. He was running a shadow government from his basement in D.C. while pretending to be retired. His lawyers are now offering full cooperation in exchange for immunity. **Trump said no. No deals. No mercy. No escape. Officials who handled the matter must now answer the details. ... There is a clear problem and the findings stand. The fight continues and the man who divided America for 8 years is about to face the America he tried to destroy. And she's awake. @TrumpNews**

Germany's nationalist AfD party is surging, winning 43.8% in Saxony-Anhalt.

El Salvador. President Nayib Bukele is receiving worldwide praise for sending in his troops to BLOW UP Haitian gang headquarters — and then Haiti's own Prime Minister THANKED him.

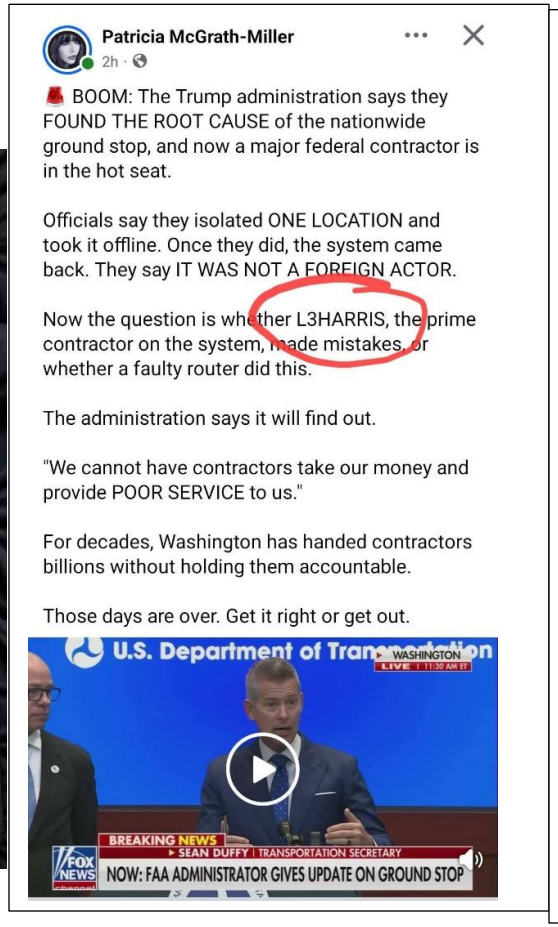

El Salvador. President Nayib Bukele is receiving worldwide praise for sending in his troops to BLOW UP Haitian gang headquarters — and then Haiti's own Prime Minister THANKED him. This comes after Haitian gangs kidnapped several of Bukele's men. BUKELE, in Creole: "We destroyed the house of Lanmò San Jou and the 400 Mawozo gang's headquarters. Most of them ran away without even trying to fight. What cowards!" HAITIAN PM: "I salute the commitment of the Salvadoran forces in the fight against gangs...THE GANGS WILL GET NO SLEEP!" **El Salvador troops fire rockets at the house of a gang leader in Haiti**

[Brazil's Flávio Bolsonaro Says He Plans to Stay in US, Assist His Party From Abroad | The Epoch Times]

Governor Abigail Spanberger approved over **$18 million** in state-funded economic development incentives to support an expansion of L3Harris Technologies' facility in Orange County.

The incentive package includes:

- **$12.5 million** from the Commonwealth's Opportunity Fund (awarded to the Orange County Board of Supervisors to assist with the project)
- **$500,000** from the Commonwealth's Opportunity Fund
- **$5 million** performance-based grant from the Virginia Investment Performance Grant Program
- Funding and training support through the Virginia Jobs Investment Program

According to discussions on Reddit, users generally reach a consensus that the Commonwealth's Opportunity Fund grants were officially awarded to the Orange County Board of Supervisors rather than directly to L3Harris.

URGENT ALERTS – FRIDAY NIGHT

NATO AND EUROPEAN CIVIL DEFENSE MANUAL First 15 MINUTES IN A BLACKOUT Plan ahead. Keep gas tank ½ + full. Pumps fail with no electricity. Store a water supply. Physical Cash on hand in $1 - $10 increments. WATER. Fill bathtub and all containers with water. No electricity, soon water pressure fails. Have 3 liters of water a day per person. Unplug ALL electronics. When electricity returns, a brutal voltage surge fries as power resumes. AM – FM Radio: Hand cranked / Battery / Satellite / Solar poweredNo Cook Food (dehydrated useless with no water). Keep freezer tightly closed, food will last 48 hrs, If door opens and closes it lasts only 4 hrs. _**https://x.com/gilaawakening/status/2121254990995927277/video/1?a=bzYs-W676GD9a4fJNVk&s=52**

Sec. of War Pete Hegseth has reportedly revived the Office of Strategic Services, the WWII intelligence and covert operations agency that preceded the CIA. The revamped office will receive at least $45 million annually and 100 dedicated personnel, with its civilian chief placed on equal footing with the military service secretaries. Hegseth is also asking Congress to establish a permanent Under Secretary of Strategic Services.

Engineering Facts

Liverpool Hospital in Sydney has become the first in the country to use an MRI-guided cryoablation system — a revolutionary tool that treats tumors without invasive surgery. This advanced machine combines **MRI imaging with ultra-cold gas technology to freeze and destroy tumors inside the body.** Doctors insert a thin, gas-powered needle into the target area under MRI guidance, allowing them to watch the entire process in real time. The precision is so high that surrounding healthy tissue remains untouched**. Patients benefit almost immediately: many report pain relief within 24 hours, minimal scarring, and no hospital stay. The procedure targets tumors on the spine, kidneys, and other soft tissues, providing an alternative for those who can't undergo surgery due to age or health conditions. By merging medical imaging and cryotherapy, this innovation reduces recovery time from weeks to hours — a milestone for pain management and tumor control. It marks a major step toward non-invasive, image-guided cancer treatment in Australia and beyond. #MedicalInnovation #Australia #CancerTreatment #MRI #Cryotherapy**

Engineering Facts

Imagine flying without fuel — forever. Scientists in the U.S. are developing a plasma-based jet engine that could make this a reality. Instead of relying on combustion or moving parts, this system generates thrust by ionizing air and accelerating the plasma using electromagnetic fields. The result? Continuous propulsion, no fuel tanks, and virtually no emissions. In controlled tests, researchers achieved 70 hours of sustained flight using this experimental plasma propulsion model, proving its incredible endurance and stability. The engine operates silently and produces a soft, glowing plasma plume — a stark contrast to the roaring heat of conventional jet engines. This breakthrough draws inspiration from fusion reactor technology, where plasma can be contained and manipulated using magnetic fields to release vast amounts of energy. **If perfected, plasma propulsion could completely reshape aviation and even space exploration, offering aircraft and satellites that fly for months — or years — without refueling. It's a step toward limitless flight and cleaner skies, merging science fiction with the engineering reality of tomorrow.**

The Good News

Engineering Facts

Less than 9% of all plastic ever produced has been recycled, largely because dirty, mixed plastics and fishing nets are too expensive to sort, wash, and melt down. **Engineers at ByFusion** developed a shipping-container-sized machine called the "Blocker" that takes raw, unwashed, mixed plastic trash and fuses it using superheated steam and hydraulic compression — without melting the plastic or releasing toxic fumes.

Every two minutes, out pops a 22-pound "ByBlock" with raised top studs that interlock just like giant LEGO bricks, requiring zero mortar or glue to stack into walls, sheds, sound barriers, and disaster-relief housing. Unlike hollow concrete cinder blocks that crack or shatter under impact, **the compressed plastic blocks cannot rot, absorb water, or crumble — and 22 pounds of landfill plastic produces exactly 22 pounds of building block with zero waste.**

Would you build a garage, garden wall, or tiny home out of interlocking recycled plastic blocks?

#EngineeringFacts #USA #RecycledPlastic #GreenConstruction #CivilEngineering #ZeroWaste
