President Trump and First Lady Melania Trump hosted the annual White House Halloween celebration on the South Lawn, greeting children in costumes and handing out commemorative treats. Military families and law enforcement families were among the honored guests, their kids front and center for an evening of festive celebration at 1600 Pennsylvania Avenue. This is what it looks like when the White House belongs to the American people again. The families who put on a uniform, strap on a badge, and run toward danger every single day got to bring their children to the most iconic home in the country for Halloween. That is the kind of First Family this country deserves.

Donald Trump For President **Trump Locks In Quarter-Billion Dollar Deal for Rural Nurses as Every Governor Steps Up**

President Trump just pulled off another one of those deals that Washington said could never happen. Sitting with CMS Administrator Dr. Mehmet Oz, he laid out a new program that puts real money into the hands of nurses willing to work where America needs them most: rural nursing homes. Trump opened the discussion by noting the scale. "For the 250 million dollars for nurses, and nobody's ever done anything like that. Tell us about it." Oz explained the problem and the fix. "Well, you wanted us to go out there and get scholarships, because we don't have enough nurses in rural parts of the country, especially in nursing homes. So this is called **Nurses for Nursing Homes."**

The federal government started with about $100 million. Trump told Oz to go get the governors involved. Every single one of them came through. Oz put it plainly: "Here's the beautiful part. We had about 100 million dollars, but you're the best negotiator I've ever met in my life, and you appropriately said, go out and get the governors, because they should chip in, every single one of them, and every single one did. They knew one way or the other you were going to get it out of them, so all the governors came in. They actually wanted to do it because it's the right thing for their states." **Trump's response was short:**

"They've been great." The result is more than a quarter billion dollars in grants. Nurses can receive up to $50,000 a year as long as they work in one of these facilities. Oz made the call to action clear. "And so we got now more than a quarter billion dollars of grants that go to nurses. They can get up to 50,000 dollars a year, which is a lot of money. And no matter what kind of education you get, we can make sure that you have an opportunity as long as you're working in one of these facilities. So we have all the details on the website. It's up now. Start applying. Start getting your money. Nursing is one of the best jobs out there." This is what happens when leadership focuses on results instead of process. Rural communities get the staffing they need, nurses get paid for the work, and governors who usually hide from hard choices decided to show up. Nobody in the previous administration moved this kind of money this fast for this purpose. The website is live. The money is real. The only question left is who applies first.

Diamond And Silk **A historic energy milestone reached Texas this week as the tanker Angerona docked in Corpus Christi carrying 1 million barrels of Venezuelan crude oil. According to the White House, the shipment arrived at zero cost to taxpayers, marking the start of a broader deal giving the U.S. majority control of over 65 billion barrels in reserves. Officials predict the influx will drive down gasoline and diesel costs nationwide.**

Campaigning in Topeka, Kansas for **Sen. Roger Marshall** on Monday**, Vice President JD Vance announced the USDA is putting $57 million into American meatpacking plants — including 10 facilities right there in Kansas — aimed at the handful of companies Vance says are squeezing families at the grocery store.**

"Four companies have dominated the vast majority of American meat processing. And here's what they do. They limit supply and they jack up the prices that Americans see at the grocery store."
Two of those four, Vance said, are *"completely controlled by foreign interests."*

He's not wrong about the concentration. The "**big four**" — JBS, Tyson, Cargill and National Beef — process roughly 85% of American beef, and the White House has pointed to JBS specifically, the world's largest meatpacker, as Brazilian-controlled. **The money runs through USDA's Meat and Poultry Processing Expansion Program, split into 147 grants across 40 states under a Trump executive order meant to expand small and mid-size processors so ranchers aren't stuck selling into a market four companies control. "*President Donald Trump, myself, and Roger Marshall say that's ridiculous and it's got to stop*," Vance told the crowd — with a Kansas Senate race riding on whether voters believe it. Four companies, 85% of your steak — not anymor**

The Patriot Oasis™@ThePatriotOasis JUST IN — **Vice President JD Vance just announced a new meat processing plant in Castro County, Texas, to give ranchers relief and break the processing monopoly. "Particularly proud to announce a very, very important thing for the people of Texas." "The Department of Agriculture is devoting millions to the opening of a new beef processing facility right here in Texas." "Now, this facility in Castro County is going to create hundreds of new jobs and process 400 head of cattle every single day." "It's going to give ranchers and local producers a fair shake against the meat processing cartel." Ken Paxton's push and Brooke Rollins' work got the funding. Hundreds of jobs and 400 head a day is the capacity. The cartel is the target.**

Edward Bruce Liang **Breaking news,,,Saudi Crown Prince Mohammed bin Salman has accused Barack Obama of being a primary sponsor of global terrorism.**

He alleged that Obama provided $150 billion to Iran, which was used to fund the acquisition of weapons and promote terrorism. Furthermore, he pointed to the deliberate creation of ISIS, the 2010 overthrow of the Libyan government, and the facilitation of Iran's development of nuclear capabilities. According to this view, Obama's team—which included John Brennan, Hillary Clinton, Valerie Jarrett, Victoria Nuland, Susan Rice, and Samantha Power—intentionally carried out these actions to maintain regional instability. They allegedly sought to use Iran as a buffer to prevent the Gulf states and Israel from gaining too much influence. **President Trump is now in the process of reversing all the policies that Barack Obama implemented, both in the realms of foreign and domestic affairs.**

- The property was listed on the market for $11.2 million, but it was then sold to Weingart for $27 million (huge gap of money that disappeared)
The city pays the NGO extremely high rates, $400,000 per bed per year for homeless housing on this property. The building sits empty
The NGO has no obligation to put a homeless person in a bed, so they can bill for every room at $400,000 per year with no one in them

It doesn't stop there. Taxpayers also cover the purchase, operations, upkeep, and problems even if the facility sits empty

Islam is not admissible to the Constitutional Republic of United States of America (regardless of "freedom of religion") because Islam's goal is to promote Islam and overthrow existing governments.

McCarran-Walters-Act

ISLAM WAS BANNED FROM THE USA IN 1952.

The Immigration and Nationality Act passed June 27, 1952 revised the laws relating to immigration, naturalization, and nationality for the United States. That act, which became **Public Law 414,** established both the law and the intent of Congress regarding the immigration of Aliens to the US and remains in effect today. Among the many issues it covers, one in particular, found in **Chapter 2 Section 212 is the prohibition of entry to the US if the Alien belongs to an organization seeking to overthrow the government of the United States by "force, violence, or other unconstitutional means."** This, by its very definition, **rules out Islamic immigration** to the United states... Islamic immigration to the US would be prohibited under this law because **the Koran (Qur'an), Sharia Law and the Hadith all REQUIRE COMPLETE SUBMISSION TO ISLAM, which is antithetical to the US Government, the Constitution, and to the Republic.** ALL Muslims who attest that the Koran (Qur'an) is their life's guiding principal subscribe to submission to Islam and its form of government...

Now the political correct crowd would say that Muslims cannot be prohibited from entering the US because Islam is a religion..

Whether it is a religion is immaterial because the law states that Aliens who are AFFILIATED WITH ANY "ORGANIZATION" that advocates the overthrow or our Government are PROHIBITED.

These students are learning how to fix cars. Along the way, they're discovering that sometimes fixing a car can help fix a whole lot more. ❤️ Students at Louisa County High School in Virginia are using their automotive classes to repair donated vehicles for local single mothers. The school partners with the nonprofit Giving Words, which provides the finished cars to families completely free of charge. The charity was founded in 2018 by Eddie and Ginny Brown after they realized that one problem repeatedly stood between single mothers and greater independence:
transportation. Without reliable transport, getting to work, attending college, reaching medical appointments and simply looking after a family can become considerably harder.

What began with Eddie repairing cars in his own driveway has since grown across Virginia, with more than 60 vehicles donated to the organization. **Now high-school students including Owen Yarrington and Stephen Smith are helping get those cars safely back on the road. For the teenagers, these aren't simply classroom projects. They know somebody will eventually be putting their children in the car they're repairing, so every bolt and every repair has to be done properly. And they get to meet some of the people whose lives their work changes.**
"When they tear up and cry," Owen said, "it makes you want to tear up and cry." Their teacher, Shane Robertson, understands the significance particularly well. He's a former student of the same automotive program who returned to teach the next generation. As he puts it, "It's not just a car. It's not just nuts and bolts. It's literally the difference between someone making it and someone not."

One recent recipient was Jessica Williams, a single mother of three who had been working as a grocery store cashier. Having reliable transportation means Jessica can now consider going to college, finding a better job and spending more time with her children. She said she'll never forget all the people who helped make it possible. These teenagers went to class to learn how to get cars running. They ended up helping families move forward too.
