Donald Trump USA Javed Ansari ·

🚨**Morning Update | TODAY… while most of us are just waking up right now… six people have already been busy working for hours. Trump. Marco. Pete. JD. Karoline. Susie.** Six very different journeys. Six very different sacrifices. And one thing they all have in common. They were already at work today before you even woke up.

Trump was already attending his first briefing before your alarm even rang. Marco was already sitting in a meeting in another country before you had your morning coffee. Pete was already shouldering the responsibility of America's entire military before you opened your eyes. JD was already aboard a plane before your day had even begun. Karoline was already standing before cameras around the world before you finished getting ready. And Susie was already working at her desk.

Through it all. Before most of us had even given our morning a second thought. Six people. Six mornings dedicated to America. Before the majority of the country had even woken up. Today… before your morning becomes busy… take a moment to say one prayer for all six of them. Because while you were peacefully sleeping last night… they were already getting ready for your morning. 😭🙏🇺🇸

Leave a ❤️right now for this entire team. Write "GOD BLESS EVERY SINGLE ONE OF THEM" below. Tag every proud American who needs to wake up today… and recognize what this team sacrificed before the rest of us had even opened our eyes.

Bart Reichenbacker Follow

Trump's deal with Putin for diesel, is bigger than most people think. It cut the legs out from under the EU and Zelensky to keep the war going. **The war is being FORCED to an end because the EU cannot afford to pay for a war, with no help from the U.S.**

When Trump made a deal with Putin for diesel, he exposed the EU's hypocrisy because they have purchased natural gas from Russia throughout the war. Funding both sides.

Trump cut off aid to Ukraine and is now funding Russia. He welcomes the "criticism" from the media and the neocon military industrial complex. Why? Because **he holds the "evidence," proving that Zelensky and his cronies have stolen half the taxpayers money given to them.** That exposure is coming and it will FORCE an end to the war.

But that's only part of what Trump is doing. This Russian "deal" is strategic for the future. Think much bigger. **Trump is setting up the world, for the greatest economic expansion ever.** It's going to be far greater than anybody can imagine and it will also happen very quickly. If massive economic expansion is the goal, **what does the world need?**

A massive "expansion" in "cheap" energy, minerals and resources. Trump's team working behind the scenes, have been making trade deals involving very important "resources."

Now here comes a story, where the curtain is being peeled back, to reveal a much bigger deal coming with Russia. **"Putin's top aide Yury Ushakov confirmed after Steve Witkoff's latest meeting with Putin that "Other large-scale joint economic projects, which offer significant prospects for bilateral cooperation, were also discussed in detail; some of them are now nearing the implementation stage." This followed Putin courting the return of US investment to Russia's resource sector in early 2025 and Kirill Dmitriev recently confirming talks on nuclear-powered data centers."** Don't miss these two important data points: "some of them (deals) are now nearing the "implementation" stage" "Putin courting the return of US "investment" to Russia's resource sector in early 2025" **They have been working on these resource "deals" since early in Trump's second term and they are now nearing "implementation." Not "sales" to the U.S. Shared "investments."** Do you understand how important these trade deals with Russia are? **Trump is destroying the cabal's generational narrative, that Russia is our enemy. At the same time, he is destroying the neocon military industrial complex theft of taxpayers money and fear of war.**

A U.S. and Russian alliance, centered around massive trade deals and cooperation, ends the propaganda fear narrative needed to promote constant war. **Putin is not our enemy and never was. He was fighting against the same cabal puppets that Trump is now busy taking down. Putin isn't just offering to "sell" resources to America. It's a much bigger deal and it will be a huge "safeguard" to prevent conflict in the future.**

What kind of deals are Trump and Putin making?

"**US stakes in Russia's energy infrastructure and companies**" "**Russia's globally significant critical mineral deposits remain woefully underexploited, but with US stakes in this industry through the above mentioned sequence and separate capital injections, it can be brought online relatively quickly for accelerating the US' diversification from dependence on China.**" "Per Dmitriev's recent disclosure, talks on nuclear-powered data centers represent another promising opportunity for both countries." "Critical mineral processing facilities and data centers can also be powered by hydroelectric dams, not just nuclear power plants, and the US can obtain stakes in all four - the facilities, centers, dams, and plants.""**The mineral deposits in which the US recently invested in Kazakhstan and Uzbekistan can reach jointly owned processing facilities in Russia through the Trans-Siberian Railway and then onward to the global market.**"

Billy Carroll Follow

PRESIDENT DONALD J. TRUMP — REBUILDING AMERICAN INDUSTRY! AMERICA FIRST IS ABOUT MORE THAN A SLOGAN. IT'S ABOUT MAKING THINGS IN AMERICA AGAIN! For decades, Americans watched factories close, manufacturing jobs move overseas, and our nation become increasingly dependent on foreign countries for essential products. President Trump's administration has made rebuilding American manufacturing, strengthening domestic supply chains, expanding energy production, and restoring our industrial independence central priorities.

LOOK AT THE MANUFACTURING AND INVESTMENT COMMITMENTS ANNOUNCED DURING HIS SECOND ADMINISTRATION!

STEEL & METALS

* Mesabi Metallics — $15 BILLION proposed steel complex in Iowa, plus $3 billion for Minnesota iron ore operations. * Hyundai Steel — $5.8 BILLION advanced steel manufacturing plant in Louisiana. * Korea Zinc — $7.4 BILLION U.S. metals and smelting project.
* Century Aluminum and Emirates Global Aluminium — $4 BILLION Oklahoma aluminum project.
* ArcelorMittal — $1.2 BILLION Alabama steel expansion.

AUTOMOBILES & BATTERIES

* Hyundai Motor Group — $26 BILLION U.S. investment commitment, including its Louisiana steel project.
* Audi — Approximately $4 BILLION proposed first U.S. vehicle manufacturing plant in Georgia, with 4,500 jobs projected. * General Motors — $4 BILLION Michigan manufacturing investment listed by the White House.
* Mercedes-Benz — $4 BILLION automotive investment project. * Toyota — $3.6 BILLION manufacturing investment listed by the White House. * Stellantis — Investments in Illinois and Indiana manufacturing facilities.

SEMICONDUCTORS & TECHNOLOGY * TSMC — $265 BILLION total announced U.S. semiconductor investment. * Micron Technology — $200 BILLION U.S. manufacturing and research investment plan, including Idaho and Virginia. * NVIDIA — $500 BILLION U.S. AI infrastructure and manufacturing commitment. * IBM — $150 BILLION U.S. investment plan. * GlobalFoundries — $21 BILLION semiconductor manufacturing expansion.

PHARMACEUTICALS & MEDICAL MANUFACTURING * Johnson & Johnson — $55 BILLION. * AstraZeneca — $50 BILLION. * Roche — $50 BILLION. * Bristol Myers Squibb — $40 BILLION. * GSK — $30 BILLION. * Eli Lilly — $27 BILLION. * Becton Dickinson — $19 BILLION. These commitments include pharmaceutical manufacturing, research, development, technology, and infrastructure.

(next page)

🇺🇸**AMERICAN SHIPBUILDING & NATIONAL DEFENSE** * Hanwha Philly Shipyard, Pennsylvania — $5 BILLION planned expansion. * Newport News Shipbuilding, Virginia — Continued nuclear aircraft carrier and submarine production, supported by efforts to expand America's submarine industrial base. * Anduril Industries, Maryland — $3.7 BILLION submarine-component manufacturing investment. * JetZero, North Carolina — $4.7 BILLION aerospace manufacturing project. * L3Harris, Arkansas — $500 MILLION defense manufacturing investment.
* Lockheed Martin, Pennsylvania — $60 MILLION manufacturing project.
🇺🇸**ENERGY, ELECTRICAL EQUIPMENT & INDUSTRIAL INFRASTRUCTURE** * Oklo — $1.7 BILLION energy project. * LIS Technologies — $1.4 BILLION nuclear fuel technology investment. * Corning — $600 MILLION industrial investment. * GE Vernova — Manufacturing investments in Pennsylvania. * Schweitzer Engineering Laboratories — Manufacturing expansion in Idaho and other states. * Sibelco — Expansion of high-purity quartz production supporting semiconductor manufacturing in North Carolina.
🇺🇸**FOOD, AGRICULTURE & ESSENTIAL GOODS** * Smithfield Foods — $1.3 BILLION. * Chobani — $1.2 BILLION. * H-E-B — $700 MILLION.
* TalusAg — $1.3 BILLION fertilizer manufacturing investment in Nebraska.
🇺🇸**AI, DIGITAL INFRASTRUCTURE & ADVANCED INDUSTRY** * Apple — $600 BILLION U.S. spending and investment commitment. * Meta — $600 BILLION U.S. AI and infrastructure commitment. * Stargate — $500 BILLION proposed private AI infrastructure initiative. * Amazon — Major U.S. cloud and data-center expansion. * AT&T — $250 BILLION network and infrastructure commitment. * Anthropic — $50 BILLION American AI infrastructure commitment.
NOW ASK YOURSELF SOMETHING. Why does rebuilding American steel production matter? Because a nation must be able to produce the materials needed for its bridges, vehicles, ships, military equipment, and infrastructure. Why does domestic pharmaceutical manufacturing matter? Because Americans should not be dangerously dependent on foreign supply chains for essential medicines. Why do semiconductor factories matter? Because advanced chips are essential to our economy, communications, transportation, and national defense. Why does American shipbuilding matter? Because our Navy, maritime industry, and national security depend on having the skilled workforce and industrial capacity to build and maintain our own vessels. And **why do tariffs matter? Because properly designed trade policies can encourage companies to manufacture here rather than rely exclusively on imports.**
THE IMPORTANT DISTINCTION: These are announced investments, expansions, and long-term commitments. Some projects are already underway, others remain proposed, and not every dollar is attributable to tariffs or to this administration alone. Some commitments also overlap and should not be added together. Nevertheless, the scale of investment activity demonstrates why restoring American industrial strength deserves serious attention.
I SUPPORT AN ADMINISTRATION THAT PRIORITIZES: 🇺🇸American manufacturing. 🇺🇸American workers and skilled trades. 🇺🇸American steel and energy. 🇺🇸American technology and innovation. 🇺🇸American shipbuilding and military readiness. 🇺🇸Economic independence and national security.
AMERICA SHOULD BE A NATION THAT BUILDS, PRODUCES, INVENTS, AND LEADS — NOT ONE THAT DEPENDS ON THE REST OF THE WORLD FOR EVERYTHING! GOD BLESS AMERICA AND THE AMERICAN WORKERS WHO BUILD IT! 🇺🇸

Donald Trump For President **Trump Just Forced Canada to Scrap Tariffs Up to 400% on American Farmers**

President Trump delivered a clear victory for U.S. agriculture today, announcing that Canada will eliminate the crushing tariffs it has long imposed on American farm exports. Standing near his plane alongside a Canadian official, Trump laid out the core of the agreement in plain terms. "One thing we should talk about is the fact that our farmers were paying tremendous tariffs to send things to Canada. All those tariffs will be done. There will be no tariffs. There will be no tariffs. They were paying as much as 400 percent for milk products and other things. So part of the agreement is that our farmers will have to pay no tariffs."

This ends the unfair protectionism that has punished American dairy producers and other farmers for years while Canadian producers enjoyed a sheltered market. The deal is straightforward: zero tariffs on U.S. farm goods heading north.

🔥🔥🔥Brigadier General Blaine Holt (ret): The Trap Has Been Set

John Michael Chambers is joined by retired Brigadier General Blaine Holt to analyze what took place at the polls and what comes next. John opens by stating his position plainly: if the Democratic sweep of the House and Senate stands, President Trump will be impeached at best, setting the republic back a decade. But he does not believe it will stand. He points to Executive Order 13848 on foreign interference in U.S. elections and the Q principle that fraud vitiates everything, and says we will not have another stolen election. More at: Facebook

Mr Pool 11/1 ▫️The undersea cable has been severed. It wasn't done by Russia. It was done by the White Hats.
Three of the major transatlantic undersea fiber-optic cables have been severed in an organized operation... Major media networks like CNN, BBC, and MSNBC are no longer connected to their European headquarters. The scripts are still being written. But the data used to coordinate narratives across the Atlantic is gone. The legacy media isn't being silenced. It's being cut off from its sources. ...The new pipelines are quantum-powered. The White Hats didn't cut the cables to destroy the internet. They cut them to liberate it.
The internet isn't being shut down. It's being reclaimed. t.me/Official_MrPoo... more at:

Check this out, pass it on. HISTORY LESSON ON YOUR SOCIAL SECURITY CARD:

Just in case some of you young whippersnappers (& some older ones) didn't know this. It's easy to check out, if you don't believe it. Be sure and show it to your family and friends. They need a little history lesson on what's what and it doesn't matter whether you are Democrat or Republican. Facts are FACTS.

Up until the 1980's, Social Security cards expressly stated the number and card were not to be used for identification purposes.

Since nearly everyone in the United States now has a number, it became convenient to use it anyway and the "NOT FOR IDENTIFICATION" message was removed.

Franklin Roosevelt, a Democrat, introduced the Social Security (FICA) Program. His promises are in black, with updates in brackets.

1.) That participation in the Program would be completely voluntary [No longer voluntary],

2.) That the participants would only have to pay 1% of the first $1,400 of their annual Incomes into the Program [Now 7.65% on the first $90,000, and 15% on the first $90,000 if you're self-employed],

3.) That the money the participants elected to put into the Program would be deductible from their income for tax purposes each year [No longer tax deductible],

4.) That the money the participants put into the independent 'Trust Fund' rather than into the general operating fund, and therefore, would only be used to fund the Social Security Retirement Program, and no other Government program [Under Johnson the money was moved to the General Fund and spent], and

5.) That the annuity payments to the retirees would never be taxed as income [Under Clinton & Gore up to 85% of your Social Security can be taxed].

Since many of us have paid into FICA for years and are now receiving a Social Security check every month — and then finding that we are getting taxed on 85% of the money we paid to the Federal government to 'put away' — you may be interested in the following:

Q: Which Political Party took Social Security from the independent 'Trust Fund' and put it into the general fund so that Congress could spend it?

A: It was Lyndon Johnson and the democratically controlled House and Senate.

Q: Which Political Party eliminated the income tax deduction for Social Security (FICA) withholding?

A: The Democratic Party.

Q: Which Political Party started taxing Social Security annuities?

A: The Democratic Party, with Al Gore casting the 'tie-breaking' deciding vote as President of the Senate, while he was Vice President of the US

AND MY FAVORITE:

Q: Which Political Party decided to start giving annuity payments to immigrants?

A: That's right! Jimmy Carter and the Democratic Party. Immigrants moved into this country, and at age 65, began to receive Social Security payments! The Democratic Party gave these payments to them, even though they never paid a dime into it!

Now, after violating the original contract (FICA), the Democrats turn around and tell you that the Republicans want to take your Social Security away!

And the worst part about it is uninformed citizens believe it! If enough people receive this, maybe a seed of awareness will be planted and maybe changes will evolve. Maybe not, though. Some Democrats are awfully sure of what isn't so — but it's worth a try. How many of you will share this to your page?

The Good News

Engineering Facts

Hot water tanks lose their heat within days, and chemical batteries slowly self-discharge. But at **Chalmers University of Technology in Gothenburg, Sweden, scientists led by Professor Kasper Moth-Poulsen created a liquid that traps summer sunlight inside its own molecular bonds for up to 18 years.** Called **MOST (Molecular Solar Thermal Energy Storage), the fluid is composed of custom carbon, hydrogen, and nitrogen molecules known as norbornadiene.** When pumped through a transparent rooftop solar collector, ultraviolet and visible photons strike each norbornadiene molecule, **causing its atomic bonds to physically twist and snap into a strained, high-energy cage isomer called quadricyclane. Even when cooled down to room temperature and stored in an uninsulated tank through the dead of winter, the liquid holds onto that trapped solar energy without losing a single degree. Whenever heat or electricity is needed, the fluid is passed over a cobalt-phthalocyanine catalyst bed — instantly snapping the molecules back to their original shape and releasing a 63°C (113°F) temperature jump on demand. Imagine bottling summer sunlight in a liquid and releasing the heat on demand in the middle of winter!**

The Knowledge Factory **Follow**

Your next tank of fuel could come from a bamboo forest. WPI researchers turned bamboo into diesel using hot pressurized water — no catalyst, no fancy chemistry. **The result? Fuel that could cost $2.75 per gallon at scale, with 26x lower emissions than regular diesel**. Why bamboo? It grows insanely fast, even on poor land, stores carbon in its roots, and doesn't compete with food crops like corn does. **The process can match all US corn-ethanol energy using just 13% of the land.** Not science fiction. Published last month. Strange to think the fastest-growing plant on Earth might also be our cheapest clean fuel.
Source: WPI / Sustainable Energy & Fuels, Sept
